DEPARTMENT OF MATHEMATICS & STATISTICS

Best Practice

1. Title:- Bridge course for slow learners

2. Goal: - To help the slow learners to improve and cope up with the basics in Mathematics on par with other students

3. Context: - This programme is initiated for First year Degree Students who are weak in basic fundamentals of the subject.

4. The practice: - We teach basic concepts essential for understanding and learning the syllabus prescribed for degree. Students are given ample practice in the basic concepts through class work and assignments. They are tested on each and every concept thoroughly. Those who don't fair-well are once again counselled and given instruction.

5. Evidence of success:-The course has always yielded good results and also proved helpful in improving the performance of the students from the examination point of view.

6. Problems encountered and resources required:- Apart from the textbook there is no special publication available in the market for slow learners to grasp the basics. Therefore it should be a special fund exclusively allocated to publish such kind of material.
