

**KBN** COLLEGE  
ESTABLISHED IN 1965

ISO 9001-2015 CERTIFIED

NAAC 'A' GRADE CYCLE 3

**KAKARAPARTI BHAVANARAYANA COLLEGE**

**(AUTONOMOUS)**

(Sponsored by S.K.P.V.V. Hindu High Schools' Committee), Kothapeta, Vijayawada - 520 001.

A College with Potential for Excellence (CPE) 3.5 Star Rating in Innovations & Start-Ups by MoE  
Recognized as Band PERFORMER in ARIIA by Ministry of Education, Govt. of India

2.6.1: The institution has stated learning outcomes (programme and course outcomes) graduate attributes which are integrated into the assessment process and widely publicised through the website and other documents and attainment of the same are evaluated by the institution

## **ADDITIONAL INFO.**

- POs, PSOs, COs of all programmes and courses
- HEI Website link for POs, PSOs, COs
- Student Induction Programme (DEEKSHARAMBH)
- FDP (Outcome Based Education) – Report & Photos
- Orientation for newly recruited faculty by IQAC – Report & Photos
- Semester End Examination Results for the last five years
- Student Participation in seminars, debates etc.
- Student Excellence - Prathibha awards
- On the Path to Employment: A Placement Data Study - 5 Years
- Feedback from alumni and employers

PROGRAMME OUTCOMES &  
SPECIFIC OUTCOMES

## PROGRAMME OUTCOMES

<b>B.Sc.</b>	<ul style="list-style-type: none"><li>✓ PO 1: Develop a deep understanding of the core concepts, theories, and principles within the chosen field of study, whether it's physics, biology, chemistry, mathematics, computer science, or any other discipline.</li><li>✓ PO 2: Acquire the ability to conduct research, gather and analyze data, and apply scientific methods to investigate questions and solve problems.</li><li>✓ PO 3: Develop critical thinking skills to evaluate information, identify issues, and solve complex problems within the discipline.</li><li>✓ PO 4: Gain proficiency in quantitative and analytical methods relevant to the field, including mathematical analysis, statistical analysis, or computational techniques.</li><li>✓ PO 5: Enhance written and oral communication skills to effectively convey scientific ideas, research findings, and technical information to both technical and non-technical audiences.</li><li>✓ PO 6: Acquire hands-on experience in conducting experiments and using laboratory equipment, techniques, and safety procedures relevant to the field.</li><li>✓ PO 7: Develop an understanding of how the chosen field of study interacts with and influences other scientific disciplines or related fields.</li><li>✓ PO 8: Recognize the need for continuous learning and adaptability in a rapidly evolving field, and pursue on-going professional development and education.</li><li>✓ PO 9: Apply theoretical knowledge and principles to real-world problems, practical applications, and research projects within the discipline.</li><li>✓ PO 10: Understand the broader implications and societal relevance of the discipline's knowledge and research, including its impact on global challenges.</li><li>✓ PO 11: Be prepared for further academic studies at the graduate level or for careers in fields related to the discipline.</li><li>✓ PO 12: Actively engage in nurturing a culture of research, upholding scientific integrity and objectivity in their scholarly pursuits.</li></ul>
<b>B.Com.</b>	<ul style="list-style-type: none"><li>✓ PO 1: Foundational Business Knowledge Demonstrate a solid understanding of core business disciplines such as accounting, finance, marketing, management, and economics.</li><li>✓ PO 2: Critical Thinking and Problem-Solving Develop critical thinking skills to analyze business problems, make informed decisions, and propose effective solutions.</li><li>✓ PO 3: Quantitative and Analytical Skills Acquire proficiency in quantitative analysis, data interpretation, and financial analysis.</li><li>✓ PO 4: Communication Skills Enhance written and oral communication skills for effective business</li></ul>

	<p>communication, including reports, presentations, and negotiations.</p> <ul style="list-style-type: none"> <li>✓ PO 5: Financial Literacy Understand financial concepts, financial markets, and financial management principles.</li> <li>✓ PO 6: Ethical and Social Responsibility Recognize the ethical dimensions of business decisions and demonstrate social responsibility in business practices.</li> <li>✓ PO 7: Entrepreneurial Mind-set Cultivate an entrepreneurial spirit, exploring opportunities for innovation and business creation.</li> <li>✓ PO 8: Professional Development and Leadership Skills Prepare for career advancement through resume building, interview skills, and job search strategies.</li> <li>✓ PO 9: Self-directed and Life-long Learning <ul style="list-style-type: none"> <li>• Identify career enhancement opportunities and engage in future academic endeavours.</li> <li>• Display skills sets in pursuit of continuous learning and adapt to the changing professional and social needs.</li> </ul> </li> </ul>
B.Voc.	<ul style="list-style-type: none"> <li>✓ PO 1: Technical Proficiency Graduates will demonstrate a high level of technical competency in their chosen field, including hands-on skills, tools, and equipment operation.</li> <li>✓ PO 2: Industry-Relevant Skills Acquire industry-specific skills and knowledge that are directly applicable to the workplace, ensuring immediate job readiness.</li> <li>✓ PO 3: Problem-Solving Abilities Develop problem-solving skills to address real-world challenges and troubleshoot issues in the field.</li> <li>✓ PO 4: Entrepreneurial Mindset Cultivate an entrepreneurial spirit and the ability to identify opportunities for innovation and business development within the field.</li> <li>✓ PO 5: Project Management Acquire basic project management skills to plan, execute, and monitor projects within the field.</li> <li>✓ PO 6: Technological Proficiency Stay up-to-date with technological advancements and use relevant tools and software in the field.</li> <li>✓ PO 7: Research and Innovation Foster a culture of research and innovation, continuously seeking improvements and new solutions.</li> <li>✓ PO 8: Career Development Prepare for career advancement through resume building, interview skills, and job search strategies specific to the industry.</li> </ul>
M.Sc.	<ul style="list-style-type: none"> <li>✓ PO 1: Advanced Knowledge</li> </ul>

Graduates will have an advanced understanding of the core concepts, theories, and principles relevant to their field of study.

✓ PO 2: Research Skills

Graduates will be proficient in conducting independent research, including the ability to design experiments, gather data, and analyze results.

✓ PO 3: Critical Thinking

Graduates will demonstrate critical thinking skills by evaluating and synthesizing existing literature and research in their field.

✓ PO 4: Problem-Solving

Graduates will have the ability to identify complex problems, propose solutions, and make informed decisions based on evidence and analysis.

✓ PO 5: Interdisciplinary Perspective

Graduates will be able to integrate knowledge and methods from different disciplines, fostering interdisciplinary approaches to problem-solving.

✓ PO 6: Technology Proficiency

Graduates will be proficient in using relevant technologies and tools required for their field of study, including software and laboratory equipment.

✓ PO 7: Innovation and Creativity

Graduates will demonstrate innovation and creativity in their research and problem-solving processes, contributing to advancements in their field.

✓ PO 8: Professional Development

Graduates will be committed to lifelong learning and professional development, staying updated with current trends, technologies, and research in their discipline.

✓ PO 9: Application of Knowledge

Graduates will apply their advanced knowledge and research skills to address real-world challenge.

### **PROGRAMME SPECIFIC OUTCOMES**

<b>B.Sc. (MPC)</b>	<ul style="list-style-type: none"><li>❧ <b>PSO 1:</b> Demonstrate a strong foundation in mathematical concepts, including calculus, algebra, and discrete mathematics, to solve complex problems in physics and chemistry.</li><li>❧ <b>PSO 2:</b> Develop a deep comprehension of fundamental principles in physics, including classical mechanics, electromagnetism, quantum mechanics, and thermodynamics.</li><li>❧ <b>PSO 3:</b> Attain a comprehensive understanding of core principles in chemistry, encompassing organic, inorganic, and physical chemistry, and apply this knowledge to chemical problem-solving.</li><li>❧ <b>PSO 4:</b> Recognize and appreciate the interconnectedness of mathematics, physics, and chemistry, and apply this interdisciplinary knowledge to solve real-world problems at the intersection of these disciplines.</li><li>❧ <b>PSO 5:</b> Acquire hands-on experience in laboratory settings, including the ability to conduct experiments, analyze data, and draw meaningful conclusions in both physics and chemistry.</li><li>❧ <b>PSO 6:</b> Apply mathematical modeling techniques to simulate and analyze physical and chemical phenomena, allowing for predictive and quantitative understanding of complex systems.</li><li>❧ <b>PSO 7:</b> Cultivate research skills, including the ability to formulate research questions, design experiments, collect and analyze data, and communicate findings effectively.</li></ul>
<b>B.Sc. (CBZ)</b>	<ul style="list-style-type: none"><li>❧ <b>PSO 1:</b> Develop a strong foundation in chemistry, including inorganic, organic, and physical chemistry, enabling the understanding of chemical principles and laboratory techniques.</li><li>❧ <b>PSO 2:</b> Acquire comprehensive knowledge of botany, encompassing plant biology, taxonomy, ecology, and plant physiology, and apply this knowledge to plant-related research and applications.</li><li>❧ <b>PSO 3:</b> Gain a deep understanding of zoology, covering animal biology, taxonomy, physiology, and ecology, and apply this knowledge to the study of animals and their ecosystems.</li><li>❧ <b>PSO 4:</b> Recognize and appreciate the connections between chemistry, botany, and zoology, and apply interdisciplinary knowledge to address complex problems in environmental science, conservation, and biotechnology.</li><li>❧ <b>PSO 5:</b> Develop practical laboratory skills and expertise in conducting experiments, and analysis in chemistry, botany, and zoology, and use these skills to investigate various biological and chemical phenomena.</li><li>❧ <b>PSO 6:</b> Apply scientific methods and research techniques to conduct investigations in botany and zoology, including fieldwork, biodiversity assessments, and ecological studies.</li><li>❧ <b>PSO 7:</b> Utilize advanced laboratory instrumentation and techniques for chemical analysis, including spectroscopy, chromatography, and microscopy.</li></ul>
<b>B.Sc.</b>	<ul style="list-style-type: none"><li>❧ <b>PSO 1:</b> Attain a strong foundation in mathematical concepts, including</li></ul>

(MPCS)

calculus, linear algebra, discrete mathematics, and mathematical logic, for solving complex problems in physics and computer science.

- ❧ **PSO 2:** Develop a deep understanding of fundamental principles in physics, covering classical mechanics, electromagnetism, quantum mechanics, and thermodynamics, and apply this knowledge to solve physical problems and phenomena.
- ❧ **PSO 3:** Acquire proficiency in programming languages, algorithms, data structures, and software development methodologies, enabling the design and implementation of computational solutions to a variety of problems.
- ❧ **PSO 4:** Recognize and appreciate the connections between mathematics, physics, and computer science, and apply interdisciplinary knowledge to address complex problems in scientific computing, simulations, and data analysis.
- ❧ **PSO 5:** Develop the ability to design, code, and test software applications, including scientific simulations, data analysis tools, and computational models.
- ❧ **PSO 6:** Cultivate research skills, including the ability to formulate research questions, design experiments or simulations, collect and analyze data, and communicate research findings effectively.
- ❧ **PSO 7:** Acquire strong problem-solving skills that can be applied to a wide range of challenges in mathematics, physics, and computer science, both in theoretical and practical contexts.
- ❧ **PSO 8:** Develop expertise in data analysis, statistical methods, and data visualization techniques, particularly for applications in physics and computer science.

B.Sc.  
(MECS)

- ❧ **PSO 1:** Attain a strong foundation in mathematical concepts, including calculus, discrete mathematics, linear algebra, and numerical methods, to solve complex problems in electronics and computer science.
- ❧ **PSO 2:** Develop a deep understanding of core principles in electronics, including circuit analysis, digital electronics, signal processing, and microelectronics.
- ❧ **PSO 3:** Acquire proficiency in programming languages, algorithms, data structures, software engineering principles, and database systems, enabling the design and development of software applications.
- ❧ **PSO 4:** Recognize and appreciate the connections between mathematics, electronics, and computer science. Apply interdisciplinary knowledge to design and analyze electronic circuits, systems, and computer software.
- ❧ **PSO 5:** Gain hands-on experience in electronics laboratories, including the ability to design, build, and troubleshoot electronic circuits and systems.
- ❧ **PSO 6:** Cultivate research skills, design experiments or simulations, collect and analyze data, and apply computational methods to solve complex problems.
- ❧ **PSO 7:** Gain expertise in embedded systems, IoT (Internet of Things), and their applications, combining electronics and computer science knowledge for practical solutions.
- ❧ **PSO 8:** - Develop skills in data analysis, digital signal processing, and data

	<p>visualization, particularly for applications in electronics and computer science.</p>
<b>B.Sc. (MSCS)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Develop a strong foundation in mathematical concepts, including calculus, linear algebra, discrete mathematics, and probability theory, to solve complex problems in statistics and computer science.</li> <li>❏ <b>PSO 2:</b> Acquire comprehensive knowledge of statistical principles, data analysis techniques, experimental design, and hypothesis testing, and apply this knowledge to analyze and interpret data.</li> <li>❏ <b>PSO 3:</b> Attain proficiency in programming languages, algorithms, data structures, software engineering, and database systems, enabling the design and development of software applications and data-driven solutions.</li> <li>❏ <b>PSO 4:</b> Recognize and appreciate the connections between mathematics, statistics, and computer science. Apply interdisciplinary knowledge to tackle complex problems in data analysis, modeling, and software development.</li> <li>❏ <b>PSO 5:</b> Develop expertise in data analysis, statistical modeling, and data visualization techniques, particularly for applications in computer science and statistical analysis.</li> <li>❏ <b>PSO 6:</b> Gain the ability to design, code, and test software applications, particularly those related to data analysis, machine learning, and artificial intelligence.</li> <li>❏ <b>PSO 7:</b> Gain proficiency in machine learning and artificial intelligence techniques, including their application to data analysis, pattern recognition, and decision-making processes.</li> <li>❏ <b>PSO 8:</b> Develop skills in database design, management, and querying, and apply them to store and retrieve data efficiently for various applications.</li> </ul>
<b>B.Sc. (MCCS)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate a strong foundation in mathematical concepts, including calculus, linear algebra, discrete mathematics, and probability theory and apply mathematical principles to solve complex problems in computer science and chemistry.</li> <li>❏ <b>PSO 2:</b> Possess a deep understanding of the fundamental principles of chemistry, including organic, inorganic, physical, and analytical chemistry.</li> <li>❏ <b>PSO 3:</b> Conduct laboratory experiments, analyze data, and interpret results accurately and safely and apply chemical knowledge to real-world problems and practical applications.</li> <li>❏ <b>PSO 4:</b> Exhibit proficiency in programming languages, algorithms, and data structures.</li> <li>❏ <b>PSO 5:</b> Understand the core principles of computer science, including software engineering, databases, and computer architecture.</li> <li>❏ <b>PSO 6:</b> Integrate mathematical, chemical, and computer science concepts to address interdisciplinary challenges and research problems.</li> <li>❏ <b>PSO 7:</b> Apply analytical and critical thinking skills to identify, formulate, and solve problems in mathematics, chemistry, and computer science.</li> <li>❏ <b>PSO 8:</b> Prepare for careers in academia, industry, government, or further education in mathematics, chemistry, computer science, or related fields.</li> </ul>
<b>B.Sc. (Data Science)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Graduates should be able to collect data from various sources, clean and pre-process it to make it suitable for analysis.</li> </ul>

	<ul style="list-style-type: none"> <li>❏ <b>PSO 2:</b> Students should be proficient in using statistical and machine learning techniques to analyze data.</li> <li>❏ <b>PSO 3:</b> Graduates should have strong programming skills, particularly in languages like Python or R.</li> <li>❏ <b>PSO 4:</b> Graduates should be capable of creating effective data visualizations using tools like Matplotlib, Seaborn, or Tableau.</li> <li>❏ <b>PSO 5:</b> Students should understand the basics of database management systems and be able to work with relational databases and SQL queries for data retrieval and manipulation.</li> <li>❏ <b>PSO 6:</b> Graduates should be familiar with big data technologies like Hadoop and Spark and be able to process and analyze large datasets efficiently.</li> <li>❏ <b>PSO 7:</b> Students should have a deep understanding of various machine learning algorithms and be able to apply them to real-world problems.</li> </ul>
<b>B.Sc. (IoT)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Graduates should have a deep understanding of the fundamental components and architecture of IoT systems, including sensors, actuators, communication protocols, and edge devices.</li> <li>❏ <b>PSO 2:</b> Graduates should be proficient in selecting, configuring, and integrating various sensors to collect data from the physical world, such as temperature sensors, motion detectors, and environmental sensors.</li> <li>❏ <b>PSO 3:</b> Graduates should be capable of acquiring, processing, and managing data generated by IoT devices, including data cleaning, filtering, and aggregation.</li> <li>❏ <b>PSO 4:</b> Graduates should have expertise in wireless communication technologies commonly used in IoT, such as Wi-Fi, Bluetooth, Zigbee, LoRa, and cellular networks.</li> <li>❏ <b>PSO 5:</b> Graduates should be familiar with IoT communication protocols and standards like MQTT, CoAP, HTTP, and understand their applications in different IoT scenarios.</li> <li>❏ <b>PSO 6:</b> Graduates should be familiar with IoT platforms and cloud services for data storage, processing, and application development, such as AWS IoT, Microsoft Azure IoT, or Google Cloud IoT.</li> <li>❏ <b>PSO 7:</b> Graduates should be proficient in developing IoT applications and services using programming languages like Python, C/C++, and JavaScript.</li> <li>❏ <b>PSO 8:</b> Graduates should have the skills and mindset to identify opportunities for IoT innovation and entrepreneurship, including product development and business planning.</li> </ul>
<b>B.Com. (Gen)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate a foundational understanding of core business concepts, including accounting, economics, finance, marketing, management, and business law.</li> <li>❏ <b>PSO 2:</b> Develop proficiency in financial accounting principles, including the preparation and interpretation of financial statements and apply accounting techniques to record, analyze, and report financial transactions.</li> <li>❏ <b>PSO 3:</b> Understand basic economic theories and concepts, including supply and demand, market structures, and macroeconomic factors affecting businesses and industries.</li> </ul>

	<ul style="list-style-type: none"> <li>❏ <b>PSO 4:</b> Analyze financial data to make informed decisions related to budgeting, investment, and financial planning and understand financial markets, instruments, and investment strategies.</li> <li>❏ <b>PSO 5:</b> Gain knowledge of marketing principles, consumer behavior, and market research and develop the ability to create marketing strategies and plans.</li> <li>❏ <b>PSO 6:</b> Learn the fundamentals of management, including leadership, organizational behavior, and human resource management.</li> <li>❏ <b>PSO 7:</b> Acquire basic IT skills necessary for business, including the use of spread sheets, databases, and business software.</li> <li>❏ <b>PSO 8:</b> Cultivate an entrepreneurial spirit by exploring opportunities for innovation and creativity in business.</li> </ul>
<b>B.Com. (T.P)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate a comprehensive understanding of tax laws, regulations, and principles, including income tax, sales tax, value-added tax (VAT), and corporate tax.</li> <li>❏ <b>PSO 2:</b> Develop the ability to prepare and file various tax returns accurately and in compliance with tax laws and regulations.</li> <li>❏ <b>PSO 3:</b> Analyze financial and business situations to develop tax-efficient strategies for individuals and organizations.</li> <li>❏ <b>PSO 4:</b> Apply tax principles to business transactions, including mergers and acquisitions, capital gains, and international taxation.</li> <li>❏ <b>PSO 5:</b> Calculate and advise individuals on their personal tax liabilities, deductions, and credits.</li> <li>❏ <b>PSO 6:</b> Conduct tax research to stay updated on changes in tax laws and regulations.</li> <li>❏ <b>PSO 7:</b> Identify potential tax-related risks and liabilities for individuals and businesses.</li> <li>❏ <b>PSO 8:</b> Understand the principles of international taxation, including transfer pricing, double taxation treaties, and cross-border tax planning.</li> </ul>
<b>B.Com. (Logistics)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate a comprehensive understanding of supply chain management, including procurement, production, distribution, and logistics.</li> <li>❏ <b>PSO 2:</b> Learn effective techniques for managing inventory, including inventory optimization, demand forecasting, and safety stock management.</li> <li>❏ <b>PSO 3:</b> Understand the principles of transportation management, including route planning, carrier selection, and cost optimization.</li> <li>❏ <b>PSO 4:</b> Familiarize oneself with logistics and supply chain management software and technology, such as enterprise resource planning (ERP) systems and warehouse management systems (WMS).</li> <li>❏ <b>PSO 5:</b> Develop the ability to create logistics strategies and plans that align with overall business objectives and evaluate and implement strategies for improving supply chain efficiency and reducing costs.</li> <li>❏ <b>PSO 6:</b> Identify potential risks in logistics and supply chain operations and develop strategies for mitigating those risks.</li> <li>❏ <b>PSO 7:</b> Analyze logistics costs and develop cost-effective logistics solutions and understand financial aspects of logistics, including budgeting and cost</li> </ul>

	<p>control.</p> <p>❏ <b>PSO 8:</b> Utilize data analytics tools and techniques to analyze logistics data and make data-driven decisions.</p>
<b>B.Com. (Comp)</b>	<p>❏ <b>PSO 1:</b> Demonstrate a comprehensive understanding of core business concepts, including accounting, economics, finance, marketing, and management.</p> <p>❏ <b>PSO 2:</b> Develop proficiency in using various computer applications and software commonly used in business environments, including Microsoft Office Suite (Word, Excel, PowerPoint, etc.).</p> <p>❏ <b>PSO 3:</b> Learn programming languages and principles, such as Java, Python, C++, or others as specified by the program and develop the ability to design and create software applications for business purposes.</p> <p>❏ <b>PSO 4:</b> Understand database concepts and gain proficiency in using database management systems (DBMS) for data storage, retrieval, and analysis.</p> <p>❏ <b>PSO 5:</b> Learn web development technologies, including HTML, CSS, JavaScript, and web frameworks and develop the ability to create and maintain business websites and web applications.</p> <p>❏ <b>PSO 6:</b> Apply analytical skills to assess business needs and propose IT solutions that enhance efficiency and effectiveness and conduct business process analysis and redesign using IT tools and methodologies.</p> <p>❏ <b>PSO 7:</b> Utilize data analytics tools and techniques to analyze business data and provide insights for decision-making and create reports and dashboards for monitoring and improving business performance.</p> <p>❏ <b>PSO 8:</b> Understand e-commerce principles and strategies for online business transactions and learn digital marketing techniques and tools for promoting products and services online.</p> <p>❏ <b>PSO 9:</b> Cultivate an entrepreneurial spirit and explore opportunities for using technology to create and innovate within a business context.</p>
<b>BBA</b>	<p>❏ <b>PSO 1:</b> Demonstrate a strong foundation in core business disciplines, including accounting, finance, marketing, management, economics, and business law.</p> <p>❏ <b>PSO 2:</b> Develop critical thinking skills to analyze complex business problems and propose effective solutions and apply problem-solving techniques to real-world business scenarios.</p> <p>❏ <b>PSO 3:</b> Utilize quantitative tools and analytical methods to analyze business data and make data-driven decisions.</p> <p>❏ <b>PSO 4:</b> Develop leadership skills and an understanding of management principles and learn how to manage teams, projects, and resources effectively.</p> <p>❏ <b>PSO 5:</b> Cultivate an entrepreneurial spirit and explore opportunities for innovation and creativity in business and understand the processes of business start-up and entrepreneurship.</p> <p>❏ <b>PSO 6:</b> Recognize the global nature of business and understand the impact of international markets and cultures and explore international business strategies and global business operations.</p> <p>❏ <b>PSO 7:</b> Learn marketing strategies and tactics for product promotion and market penetration.</p>

	<ul style="list-style-type: none"> <li>❏ <b>PSO 8:</b> Understand financial management principles, including budgeting, financial analysis, and financial planning and evaluate investment opportunities and manage financial resources effectively.</li> <li>❏ <b>PSO 9:</b> Develop skills in strategic thinking and planning and implement strategic plans for businesses and organizations.</li> </ul>
<b>BCA</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate proficiency in programming languages such as Java, C++, Python, or others as specified by the program and develop the ability to design, code, test, and debug software applications.</li> <li>❏ <b>PSO 2:</b> Create software applications for various platforms, including desktop, web, and mobile and understand software development methodologies and best practices.</li> <li>❏ <b>PSO 3:</b> Design and implement database systems using database management systems (DBMS) such as MySQL, Oracle, or SQL Server.</li> <li>❏ <b>PSO 4:</b> Develop dynamic and interactive websites using web technologies like HTML, CSS, JavaScript, and web frameworks and understand front-end and back-end development.</li> <li>❏ <b>PSO 5:</b> Gain knowledge of operating system principles and concepts and perform system administration tasks on different operating systems.</li> <li>❏ <b>PSO 6:</b> Understand cybersecurity threats and best practices for securing computer systems and networks and Learn about ethical hacking and security testing.</li> <li>❏ <b>PSO 7:</b> Develop mobile applications for iOS and Android platforms and Understand mobile app design, user experience (UX), and best practices.</li> <li>❏ <b>PSO 8:</b> Understand the ethical and legal aspects of software development, including intellectual property rights and data privacy regulations.</li> </ul>
<b>B.Voc. (WT&amp;SD)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate proficiency in web development technologies, including HTML, CSS, JavaScript, and popular web frameworks and Develop the ability to create responsive and interactive web applications and websites.</li> <li>❏ <b>PSO 2:</b> Learn server-side programming languages and frameworks and Build server-side applications, RESTful APIs, and integrate them with frontend technologies.</li> <li>❏ <b>PSO 3:</b> Design, create, and manage databases using database management systems (DBMS) such as MySQL, PostgreSQL, or MongoDB, and Perform database operations, optimization, and administration.</li> <li>❏ <b>PSO 4:</b> Acquire full-stack development skills, encompassing both frontend and backend development and create end-to-end web applications and deploy them effectively.</li> <li>❏ <b>PSO 5:</b> Understand web security principles and best practices and Implement security measures to protect web applications from common vulnerabilities.</li> <li>❏ <b>PSO 6:</b> Develop skills in web design, focusing on creating visually appealing and user-friendly interfaces and Conduct usability testing and improve user experiences.</li> <li>❏ <b>PSO 7:</b> Learn to use version control systems such as Git for code collaboration and management.</li> <li>❏ <b>PSO 8:</b> Develop problem-solving skills to identify, troubleshoot, and debug</li> </ul>

	<p>software issues and analyze and resolve technical problems efficiently.</p>
<p><b>MBA</b></p>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Develop effective leadership skills to inspire and guide teams in achieving organizational goals and learn management techniques for planning, organizing, and controlling resources and operations.</li> <li>❏ <b>PSO 2:</b> Enhance strategic thinking abilities to analyze complex business situations and make informed decisions and evaluate alternative strategies and their impact on the organization.</li> <li>❏ <b>PSO 3:</b> Gain a solid understanding of core business functions, including finance, marketing, operations, human resources, and information technology.</li> <li>❏ <b>PSO 4:</b> Recognize the global nature of business and understand the implications of international markets, trade, and cultural diversity.</li> <li>❏ <b>PSO 5:</b> Cultivate an entrepreneurial spirit and explore opportunities for innovation and entrepreneurship within organizations or start-ups.</li> <li>❏ <b>PSO 6:</b> Enhance communication skills and public speaking skills to effectively convey ideas, negotiate, and influence others in diverse business contexts.</li> <li>❏ <b>PSO 7:</b> Develop marketing strategies, including product development, pricing, promotion, and distribution, manage and enhance brand equity and customer relationships.</li> <li>❏ <b>PSO 8:</b> Learn human resource management principles, including recruitment, training, compensation, and performance evaluation.</li> <li>❏ <b>PSO 9:</b> Understand corporate governance principles and their importance in ethical decision-making within organizations.</li> </ul>
<p><b>MCA</b></p>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate proficiency in programming languages such as Java, C++, Python, or others as specified by the program and Develop the ability to design, code, test, and debug complex software applications.</li> <li>❏ <b>PSO 2:</b> Create software applications for various platforms, including desktop, web, mobile, and cloud-based systems and Understand software development methodologies and best practices.</li> <li>❏ <b>PSO 3:</b> Design and implement advanced database systems using database management systems (DBMS) such as Oracle, MySQL, SQL Server, or NoSQL databases - Perform database optimization, tuning, and administration.</li> <li>❏ <b>PSO 4:</b> Develop web applications and mobile apps for iOS and Android platforms using relevant technologies and frameworks.</li> <li>❏ <b>PSO 5:</b> Gain in-depth knowledge of operating system concepts, kernel architecture, and system software development.</li> <li>❏ <b>PSO 6:</b> Master advanced data structures and algorithms to solve complex computational problems efficiently - Analyze algorithmic complexity and optimization.</li> <li>❏ <b>PSO 7:</b> Understand computer network protocols, architectures, and security principles and design and secure networked systems and applications.</li> <li>❏ <b>PSO 8:</b> learn and Apply AI and ML in various applications, including data analysis and predictive modeling.</li> <li>❏ <b>PSO 9:</b> Explore cloud computing platforms and distributed system architectures - Deploy and manage applications in cloud environments.</li> <li>❏ <b>PSO 10:</b> Conduct research in computer science and contribute to the</li> </ul>

	development of new technologies and solutions and Publish research findings in relevant journals and conferences.
<b>M.Sc. (OCH)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate a comprehensive understanding of the principles and theories of organic chemistry, including reaction mechanisms, stereochemistry, and chemical synthesis.</li> <li>❏ <b>PSO 2:</b> Develop advanced laboratory techniques for organic synthesis, purification, and characterization of organic compounds.</li> <li>❏ <b>PSO 3:</b> Gain proficiency in using advanced analytical instruments such as nuclear magnetic resonance (NMR) spectroscopy, mass spectrometry (MS), and infrared (IR) spectroscopy for compound analysis.</li> <li>❏ <b>PSO 4:</b> Design and execute complex organic syntheses, including multi-step reactions and the synthesis of natural products.</li> <li>❏ <b>PSO 5:</b> Interpret spectroscopic data to determine the structure, configuration, and purity of organic compounds - Identify functional groups and analyze chemical spectra.</li> <li>❏ <b>PSO 6:</b> Understand reaction mechanisms and reaction kinetics for various organic transformations and apply mechanistic understanding to predict and explain chemical reactivity.</li> <li>❏ <b>PSO 7:</b> Explore specialized areas of organic chemistry, such as organometallic chemistry, heterocyclic chemistry, natural product chemistry, and polymer chemistry.</li> <li>❏ <b>PSO 8:</b> Develop research skills for planning, executing, and documenting experimental work.</li> </ul>
<b>M.Sc. (ACH)</b>	<ul style="list-style-type: none"> <li>❏ <b>PSO 1:</b> Demonstrate a comprehensive understanding of the principles and theories of analytical chemistry, including various analytical techniques and methods.</li> <li>❏ <b>PSO 2:</b> Develop advanced laboratory techniques for sample preparation, chemical analysis, and data interpretation.</li> <li>❏ <b>PSO 3:</b> Gain expertise in using a wide range of analytical instruments, such as chromatography (HPLC, GC), mass spectrometry (MS), spectroscopy (NMR, IR, UV-Vis), and electrochemical methods.</li> <li>❏ <b>PSO 4:</b> Design and optimize analytical methods for the qualitative and quantitative analysis of chemical compounds and materials - Validate methods for accuracy, precision, and reliability.</li> <li>❏ <b>PSO 5:</b> Interpret spectroscopic data from various instruments to identify chemical species and characterize compounds - Analyze spectra for structural information and quantification.</li> <li>❏ <b>PSO 6:</b> Apply chromatographic techniques to separate, isolate, and quantify components of complex mixtures - Optimize chromatographic conditions and troubleshoot separations.</li> <li>❏ <b>PSO 7:</b> Implement quality control procedures to ensure the reliability and accuracy of analytical results - Comply with relevant quality standards and regulations.</li> <li>❏ <b>PSO 8:</b> Conduct independent research or participate in research projects under the guidance of faculty members and Present research findings in a thesis or dissertation.</li> </ul>

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.Sc. CBZ	First semester	Fundamentals of Microbes and Non-vascular Plants	R20BOT101A	2022-2023	<ul style="list-style-type: none"> <li>✓ Explain origin of life on the earth.</li> <li>✓ Classify fungi, lichens, algae and bryophytes based on their structure, reproduction and life cycles.</li> <li>✓ Analyze and ascertain the plant disease symptoms due to viruses, bacteria and fungi.</li> <li>✓ Recall and explain the evolutionary trends among amphibians of plant kingdom for their shift to land habitat.</li> <li>✓ Evaluate the ecological and economic value of microbes, thallophytes and bryophytes.</li> </ul>
I B.Sc. CBZ	Second Semester	Basics of Vascular plants and Phytogeography	R20BOT201A	2022-2023	<ul style="list-style-type: none"> <li>✓ Classify and compare pteridophytes and Gymnosperms based on their morphology, anatomy, reproduction and life cycles.</li> <li>✓ Demonstrate the process of fossilization and compare the characteristics of extinct and extant plants.</li> <li>✓ Apply various taxonomical aids for identification of Angiosperms.</li> <li>✓ Analyze the morphology of the most common Angiosperm plants of their localities and recognize their families.</li> <li>✓ Identify the different phytogeographical regions of the world and can analyse their floristic wealth.</li> </ul>
II B.Sc. CBZ	Third semester	Anatomy and Embryology of Angiosperms,	R20BOT301	2021-2022	<ul style="list-style-type: none"> <li>✓ Understand the organization of tissues and tissue systems in plants.</li> <li>✓ Understand the basic concepts of plant ecology, and</li> </ul>

		Plant Ecology and Biodiversity			<p>evaluate the effects of environmental and biotic factors on plant communities.</p> <ul style="list-style-type: none"> <li>✓ Correlate the importance of biodiversity and consequences due to its loss.</li> <li>✓ Illustrate and interpret various aspects of embryology.</li> <li>✓ Enlist the endemic/endangered flora and fauna from two biodiversity hot spots in India and assess their strategies of conversation.</li> </ul>
II B.Sc. CBZ	Fourth Semester	Plant Physiology and Metabolism	R20BOT401	2021-2022	<ul style="list-style-type: none"> <li>✓ Evaluate the role of minerals in plant nutrition and their deficiency symptoms.</li> <li>✓ Interpret the role of enzymes in plant metabolism.</li> <li>✓ Critically understand the light reactions and carbon assimilation processes responsible for synthesis of food in plants.</li> <li>✓ Analyze the biochemical reactions in relation to Nitrogen and lipid metabolisms.</li> <li>✓ Evaluate the physiological factors that regulate growth and development in plants.</li> </ul>
II B.Sc. CBZ	Fourth Semester	Cell Biology, Genetics and Plant Breeding	R20BOT402	2021-2022	<ul style="list-style-type: none"> <li>✓ Explain the procedures of selection and hybridization for improvement of crops.</li> <li>✓ Understand the basics of Mendelian genetics, its variations and interpret inheritance of traits in living beings.</li> <li>✓ Evaluate the structure, function and regulation of genetic material.</li> <li>✓ Understand the applications, principles and modern techniques in plant breeding.</li> <li>✓ Explain the organization of a eukaryotic chromosome</li> </ul>

					and the structure of genetic material.
III B.Sc. CBZ	Fifth Semester	Plant Propagation	R20BOTA501	2022- 2023	<ul style="list-style-type: none"> <li>✓ Explain various plant propagation structures and their utilization.</li> <li>✓ Understand advantages and disadvantages of vegetative, asexual and sexual plant propagation methods.</li> <li>✓ Assess the benefits of asexual propagation of certain economically valuable plants using apomictics and adventive polyembryony.</li> <li>✓ Demonstrate skills related to vegetative plant propagation techniques such as cuttings, layering, grafting and budding.</li> <li>✓ Apply a specific macro-propagation technique for a given plant species.</li> </ul>
III B.Sc. CBZ	Fifth Semester	Seed Technology	R20BOTA502	2022- 2023	<ul style="list-style-type: none"> <li>✓ Explain the causes for seed dormancy and methods to break dormancy.</li> <li>✓ Understand critical concepts of seed processing and seed storage procedures.</li> <li>✓ Acquire skills related to various seed testing methods.</li> <li>✓ Identify seed borne pathogens and prescribe methods to control them.</li> <li>✓ Understand the legislations on seed production and procedure of seed certification.</li> </ul>

DEPARTMENT OF ZOOLOGY

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.Sc. CBZ	I	BIOLOGY OF NON- CHORDATES	R20ZOO101A	2021-22	<p>On completion of this course, students will have the knowledge and skills to:</p> <ul style="list-style-type: none"> <li>○ Describe the variety of invertebrate organisms and explain their evolutionary origin and diversification.</li> <li>○ Investigate invertebrates in laboratory and field conditions and identify major taxonomic groups.</li> <li>○ Understand and communicate the major evolutionary innovations in invertebrate groups.</li> <li>○ Describe the functional significance of associated morphologies and behaviors.</li> </ul>
I B.Sc. CBZ	II	BIOLOGY OF CHORDATES	R20ZOO201A	2021-22	<ul style="list-style-type: none"> <li>○ Understand the evolution of chordates including their phylogeny and the modification of key innovations and homologous structures</li> <li>○ Identify and describe the defining characteristics of the major vertebrate classes as well as hemi- and proto chordates.</li> <li>○ Describe the major architectural features of the integumentary, skeletal, nervous, muscular, digestive, respiratory, circulatory, excretory and reproductive systems.</li> <li>○ Develop an understanding of the application of comparative anatomy in current scientific methods.</li> </ul>
II B.Sc. CBZ	III	CELL BIOLOGY, GENETICS, MOLECULAR BIOLOGY AND	R20ZOO301A	2021-22	<ul style="list-style-type: none"> <li>○ To understand the basic unit of the living organisms and to differentiate the organisms by their cell structure and to describe fine structure and function of plasma membrane and different cell organelles of eukaryotic cell.</li> </ul>

		EVOLUTION			<ul style="list-style-type: none"> <li>○ To understand the history of origin of branch of genetics, gain knowledge on heredity, interaction of genes, various types of inheritance patterns existing in animals</li> <li>○ Acquiring in-depth knowledge on various of aspects of genetics involved in sex determination, human karyotyping and mutations of chromosomes resulting in various disorders</li> <li>○ Understand the central dogma of molecular biology and flow of genetic information from DNA to proteins.</li> <li>○ Understand the principles and forces of evolution of life on earth, the process of evolution of new species and apply the same to develop new and advanced varieties of animals for the benefit of the society.</li> </ul>
II B.Sc. CBZ	IV	ANIMAL PHYSIOLOGY, CELLULAR METABOLISM AND EMBRYOLOGY	R20ZOO401A	2021-22	<ul style="list-style-type: none"> <li>○ Understand the functions of important animal physiological systems including digestion, cardio-respiratory and renal systems.</li> <li>○ Understand the muscular system and the neuro-endocrine regulation of animal growth, development and metabolism with a special knowledge of hormonal control of human reproduction.</li> <li>○ Describe the structure, classification and chemistry of biomolecules and enzymes responsible for sustenance of life in living organisms</li> <li>○ Develop broad understanding the basic metabolic activities pertaining to the catabolism and anabolism of various biomolecules</li> <li>○ Describe the key events in early embryonic development starting from the formation of gametes upto gastrulation and formation of primary germ layers.</li> </ul>
II B.Sc.	IV	IMMUNOLOGY	R20ZOO402A	2021-22	<ul style="list-style-type: none"> <li>○ To provide students with a foundation in immunological</li> </ul>

CBZ		AND ANIMAL BIOTECHNOLOGY			<p>processes</p> <ul style="list-style-type: none"> <li>○ To be able to compare and contrast the innate versus adaptive immune systems and humoral versus cell-mediated immune responses</li> <li>○ Understand the significance of the Major Histocompatibility Complex in terms of immune response and transplantation</li> <li>○ To provide knowledge on animal cell and tissue culture and their preservation</li> <li>○ To empower students with latest biotechnology techniques like stem cell technology, genetic engineering, hybridoma technology, transgenic technology and their application in medicine and industry for the benefit of living organisms.</li> </ul>
III B.Sc. CBZ	V	SUSTAINABLE AQUACULTURE MANAGEMENT	R20ZOO501	2021-22	<ul style="list-style-type: none"> <li>○ Understand why there is a need for fisheries management and regulation.</li> <li>○ Be able to understand the various problems to be faced in maintaining water quality.</li> <li>○ Be able to analyse and discuss how different types of regulations affect economic behaviour.</li> <li>○ Be familiar with the feed formulation and feed storage.</li> <li>○ Know the relevant markets for fish and aquaculture products, know how these markets work and how they affect production.</li> </ul>
III B.Sc. CBZ	V	POST HARVEST TECHNOLOGY OF FISH AND FISHERIES	R20ZOO502	2021-22	<ul style="list-style-type: none"> <li>○ Learn the importance of proper handling methods and timing of fish crops to obtain maximum benefit from aquaculture.</li> <li>○ Use methods to prevent spoilage of fish and its products by preservation and processing.</li> <li>○ Realise that no part of fish is waste and most of it can be recovered as useful by product</li> <li>○ Know that an integrated approach by the aqua culturist,</li> </ul>

					harvester and processor of aqua products is essential to obtain superior quality products.

DEPARTMENT OF COMPUTER SCIENCE

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I BCA	I	Computer Fundamentals and Office Tools	R20BCA101A	2022-2023	<ol style="list-style-type: none"> <li>1. Identify categories of programs, system software and applications. Organize and work with files and folders.</li> <li>2. Compose, format and edit a word document and working with macros.</li> <li>3. Create work sheets and using various functions.</li> <li>4. Make presentations and inserting multimedia in them.</li> <li>5. Describe the usage of computers and why computers are essential components in business and society.</li> </ol>
I BCA	I	Programming with 'C'	R20BCA102A	2022-2023	<ol style="list-style-type: none"> <li>1. To learn about data types and operators.</li> <li>2. To learn about decision making statements and functions</li> <li>3. To learn how to work with arrays and strings and structures.</li> <li>4. To understand character arrays and concept of pointers.</li> <li>5. To understand the concept of files.</li> </ol>
I BCA	II	Data base management	R20BCADBMS201	2022-23	<ol style="list-style-type: none"> <li>1. An ability to apply Knowledge of computing and mathematics in Computer Science &amp; Engineering.</li> </ol>

		system			<ol style="list-style-type: none"> <li>2. An ability to analyze a problem, identify and define the computing requirements appropriate to its solution.</li> <li>3. An ability to design, implement and evaluate a computer-based system to meet desired needs with appropriate societal considerations.</li> <li>4. An ability to conduct investigations, interpret data and provide conclusions in investigating complex problems related to Computer Science &amp; Engineering.</li> <li>5. An ability to engage in continuing professional development and life-long learning.</li> </ol>
I BCA	II	Data structures	R20BCA202A	2022-2023	<ol style="list-style-type: none"> <li>1. Ability to analyze algorithms and algorithm correctness.</li> <li>2. Ability to summarize searching and sorting techniques</li> <li>3. Ability to describe stack, queue and linked list operation.</li> <li>4. Ability to describe linked list operation.</li> <li>5. Ability to have knowledge of tree and graphs concepts</li> </ol>
I BCA	II	PYTHON PROGRAMMING	R20BCA203A	2022-2023	<ol style="list-style-type: none"> <li>1. To understand the Basics of python language and Python IDLE. and Install and run python Interpreter.</li> <li>2. To gain knowledge about different data types and operators.</li> <li>3. To use and explore control structures and loop constructs in python.</li> <li>4. To import and create arrays using array module.</li> </ol>

					5. To explore the use of Lambdas, List, Tuples.
II BCA	III	Object Oriented Programing through JAVA	R20BCA30 1	2021-2022	<ol style="list-style-type: none"> <li>1. Demonstrate good object-oriented programmingskillsinJava</li> <li>2. Ableto describe,recognize, applyand implementslected design patterns in Java</li> <li>3. Understand thecapabilities and limitations of Java</li> <li>4. Be familiarwith common errors inJava and its associated libraries</li> <li>5. Develop excellent debuggingskills</li> </ol>
II BCA	III	Operating Systems	R20BCA30 2	2021-2022	<ol style="list-style-type: none"> <li>1.An ability to understand basic concepts of operating system.</li> <li>2. An ability to understand linux shell and scheduling.</li> <li>3. An ability to analyze memory management and deadlocks.</li> <li>4. An ability to describe memory management and concurrency control mechanisms.</li> <li>5. An ability to compare various file systems</li> </ol>
II BCA	IV	Cyber Laws	R20BCA40 1	2021-2022	<ol style="list-style-type: none"> <li>1. Critically evaluate ongoing developments in law relating to information technologies.</li> <li>2. Display an understanding of how these developments relate to one another.</li> <li>3. Examine areas of doctrinal and political debate surrounding rules and theories;</li> <li>4. Evaluate those rules and theories in terms of internal coherence</li> </ol>

					and practical outcomes. 5. Draw on the analysis and evaluation contained in primary and secondary sources.
II BCA	IV	DATA MINING AND WAREHOUSING	R20BCA402	2021-2022	<ol style="list-style-type: none"> <li>1. Examine the types of the data to be mined and present a general classification of tasks and primitives to integrate a data mining system.</li> <li>2. Apply pre-processing statistical methods for any given raw data</li> <li>3. Discover interesting patterns from large amounts of data to analyse and extract patterns to solve problems, make predictions of outcomes</li> <li>4. Comprehend the roles that data mining plays in various fields and manipulate different data mining techniques</li> <li>5. Select and apply proper data mining algorithms to build analytical applications.</li> <li>6. Evaluate and implement a wide range of emerging and newly-adopted methodologies and technologies to facilitate the knowledge discovery</li> </ol>
II B.C.A	IV	Web Programming	R20BCA403	2021-2022	<ol style="list-style-type: none"> <li>1. Able to use Building Blocks of PHP, Access array elements.</li> <li>2. Able to use various functions and handle data using files..</li> <li>3. Able to use working with Forms, Sessions, Cookies.</li> </ol>

					<ol style="list-style-type: none"> <li>4. Able to implement Java Script.</li> <li>5. Able to implement basic concepts of Angular JS for Web development.</li> </ol>
II B.C.A	IV	DESIGN OF OBJECT ORIENTED APPLICATIONS	R20BCA404	2021-2022	<ol style="list-style-type: none"> <li>1. Have Knowledge in micro and macro process.</li> <li>2. Have Knowledge in management planning, quality assurance and metrics along with documentation of object oriented development.</li> <li>3. Have Knowledge in system architecture.</li> <li>4. Basic knowledge in AI and Data Acquisition.</li> <li>5. Knowledge in applications of Object Oriented Design.</li> </ol>
II B.C.A	IV	DATA ANALYTICS USING R	R20BCA405	2021-2022	<ol style="list-style-type: none"> <li>1. Data-Visualization tools and techniques offer executives and other knowledge workers new approaches to dramatically improve their ability to grasp information hiding in their data.</li> <li>2. Data visualization is a general term that describes any effort to help people understand the significance of data by placing it in a visual context.</li> <li>3. Patterns, trends and correlations that might go undetected in text-based data can be exposed and recognized easier with data visualization software.</li> <li>4. It isn't just the attraction of the huge range of statistical analyses afforded by R that attracts data people to R. The language has also developed a rich ecosystem of charts, plots and visualizations</li> </ol>

					over the years. 5. ggplot2 is a data visualization package for the statistical programming language R
II B.C.A	IV	Object Oriented Software Engineering	R20BCA406	2021-2022	<ol style="list-style-type: none"> <li>1. Explain the motivation for and development of object-oriented programming languages.</li> <li>2. Produce a set of use cases given a problem statement.</li> <li>3. Produce class diagrams, object interaction diagrams and object state transition diagrams for a given problem.</li> <li>4. Describe the essential features of an object-oriented programming language.</li> <li>5. Produce and/or debug code fragments that illustrate principles of object-oriented software development.</li> <li>6. Describe the principles for testing object-oriented software and derive sets of test data given a specification.</li> </ol>
III BCA	V	MACHINE LEARNING USING PYTHON	R20BCA50 1	2022-2023	<ol style="list-style-type: none"> <li>1. Identify the characteristics of machine learning.(Understand- L2)</li> <li>2. Summarize the Model building and evaluation approaches(Understand- L2)</li> <li>3. Apply Bayesian learning and regression algorithms for real-world Problems.(Apply- L3)</li> <li>4. Apply supervised learning algorithms to solve the real-world</li> </ol>

					Problems. (Apply- L3) 5. Apply unsupervised learning algorithms for the real world data. (Apply- L3)
III BCA	V	DIGITAL IMAGING	R20BCA50 2	2022-2023	1. Gain knowledge about Types of Graphics, Types of Objects, Types of video editing tools 2. Show their skills in editing and altering photographs for through a 3. Basic understanding of the tool box. 4. Gain knowledge in using the layers. 5. Gain knowledge in using the selection tools, repair tools. 6. Gain knowledge in using selection tools , applying filters and can show their skills.
III BCA	V	CYBER SECURITY AND MALWARE ANALYSIS	R20BCA50 3	2022-2023	1. Understand the computer networks, networking tools and cyber security 2. Learn about NIST Cyber Security Framework 3. Understand the OWASP Vulnerabilities 4. Implement various Malware analysis tools 5. Understand about Information Technology act 2000
III BCA	V	Selenium	R20BCA50 4	2022-2023	1. Selenium is a free automation testing tool for web applications. 2. It is able to work with different browsers like Chrome, Firefox, IE, Opera and simulate human like behaviour. 3. Selenium is able to interact with all the different elements in a

					<p>webpage. It can click on them, input text, extract text and much more. By covering all the different functionalities on your website with Selenium tests, you will be able to quickly catch new and reappearing old bugs. This will save your time and money.</p> <ol style="list-style-type: none"> <li>4. We can run our test cases on various environments using selenium grid .</li> <li>5. we can integrate with project management tools for managing the projects</li> </ol>
III B.C.A	V	MOBILE APPLICATION DEVELOPMENT	R20BCA505	2022-23	<ol style="list-style-type: none"> <li>1. Identify basic terms ,tools and software related to android systems</li> <li>2. Describe components of IDE, understand features of android development tools</li> <li>3. Describe the layouts and controls</li> <li>4. Explain the significance of displays using the given view</li> <li>5. Explain the features of services and able to publish android Application</li> <li>6. Developing interesting Android applications using MIT App Inventor.</li> </ol>
III B.C.A	V	JAVA Full Stack Development	R20BCA506	2022-23	<ol style="list-style-type: none"> <li>1. Building Strong expertise to develop front end application using HTML5</li> <li>2. Building Strong expertise to develop front end application using CSS3</li> </ol>

					<ol style="list-style-type: none"> <li>3. To become proficient in Bootstrap concepts and To develop a web pages based on Bootstrap</li> <li>4. Implementation of web application employing efficient database access.</li> <li>5. Develop a fully functioning website and deploy on a web server.</li> </ol>
B.Sc(MPCS, MECS, MSCS, MCCS, DATA SCIENCE , IOT)	I	Programming with 'C'	R20-CSC101A	2022-2023	<ol style="list-style-type: none"> <li>1. To learn about data types and operators.</li> <li>2. To learn about decision making statements and functions</li> <li>3. To learn how to work with arrays and strings and structures.</li> <li>4. To understand character arrays and concept of pointers.</li> <li>5. To understand the concept of files.</li> </ol>
I B.Sc(MPCS,M ECS,MSCS,M CCS)	II	PROGRAMMING with JAVA	R20-CSC201A	2022-2023	<ol style="list-style-type: none"> <li>1. To learn Object-Oriented programming concepts and techniques using the Java programming language.</li> <li>2. To learn to write, test, and debug introductory level Object-Oriented programs using Java. In addition, the student will be introduced to the following concepts, which are important workforce activities:</li> <li>3. Design/Develop Program</li> <li>4. Design classes ,interfaces, packages</li> <li>5. Use multithreading concepts to develop inter process communication.</li> <li>6. Design the applet program</li> </ol>

					7. Understanding Inheritance.
II BSc(MPCs, MECs, MSCs, MCCs)	III	DATABASE MANAGEMENT SYSTEMS	R20BSC301	2021-2022	<ol style="list-style-type: none"> <li>1. Gain knowledge of Database and DBMS.</li> <li>2. Understand the fundamental concepts of DBMS with special emphasis on relational data model.</li> <li>3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database</li> <li>4. Model database using ER Diagrams and design database schemas based on the model.</li> <li>5. Create a small database using SQL.</li> <li>6. Store, Retrieve data in database.</li> </ol>
II BSc(MPCs. MECs, MSCs, MCCs)	IV	DATA STRUCTURES USING C	R20BSC401	2021-2022	<ol style="list-style-type: none"> <li>1. Understand available Data Structures for data storage and processing.</li> <li>2. Comprehend Data Structure and their real-time applications - Stack, Queue, LinkedList, Trees and Graph</li> <li>3. Choose a suitable Data Structures for an application</li> <li>4. Develop ability to implement different Sorting and Search methods</li> <li>5. Have knowledge onData Structures basic operations like insert, delete, search,updateand traversal</li> </ol>

					6. Design and develop programs using various data structures Implement the applications of algorithms for sorting, pattern matching etc
II BSc(MPCs, MECs, MSCs, MCCs)	IV	Operating Systems	R20BSC402	2021-2022	<ol style="list-style-type: none"> <li>1. Know Computer system resources and the role of operating system in resource management with algorithms</li> <li>2. Understand Operating System Architectural design and its services.</li> <li>3. Gain knowledge of various types of operating systems including Unix and Android.</li> <li>4. Understand various process management concepts including scheduling, synchronization, and deadlocks.</li> <li>5. Have a basic knowledge about multithreading.</li> <li>6. Comprehend different approaches for memory management.</li> <li>7. Understand and identify potential threats to operating systems and the security features design to guard against them.</li> <li>8. Specify objectives of modern operating systems and describe how operating systems have evolved over time.</li> <li>9. Describe the functions of a contemporary operating system</li> </ol>
III	V	Web Interface	R20ABSC501	2022-23	1. Understand and appreciate the web architecture and services.

B.Sc(MPCS,M ECS,MSCS,M CCS)		Designing Technologies			<ol style="list-style-type: none"> <li>2. Gain knowledge about various components of a website.</li> <li>3. Demonstrate skills regarding creation of a static website</li> <li>4. Interface to dynamic website.</li> <li>5. Learn how to install word press and gain the knowledge of installing various plugins to use in their websites.</li> </ol>
III B.Sc (MPCS,MECS, MSCS,MCCS)	V	Web Applications Development using PHP & MYSQL	R20ABSC502	2022-2023	<ol style="list-style-type: none"> <li>1. Write simple programs in PHP.</li> <li>2. Understand how to use regular expressions, handle exceptions, and validate data using PHP.</li> <li>3. Apply In-Built functions and Create User defined functions in PHP programming.</li> <li>4. Write PHP scripts to handle HTML forms.</li> <li>5. Write programs to create dynamic and interactive web based applications using PHP and MYSQL.</li> <li>6. Know how to use PHP with a MySQL database and can write database driven web pages</li> </ol>
B.Sc (DATA SCIENCE , IOT)	I	Programming with 'C'	R20-CSC101A	2022-2023	<ol style="list-style-type: none"> <li>1. To learn about data types and operators.</li> <li>2. To learn about decision making statements and functions</li> <li>3. To learn how to work with arrays and strings and structures.</li> <li>4. To understand character arrays and concept of pointers.</li> <li>5. To understand the concept of files.</li> </ol>

B.Sc(DATA SCIENCE,IOT )	II	Data structures	R20-DSIOT201A	2022-2023	<ol style="list-style-type: none"> <li>1. Ability to analyze algorithms and algorithm correctness.</li> <li>2. Ability to summarize searching and sorting techniques</li> <li>3. Ability to describe stack, queue and linked list operation.</li> <li>4. Ability to describe linked list operation.</li> <li>5. Ability to have knowledge of tree and graphs concepts</li> </ol>
DATA SCIENCE	II	Intro.to R programming	R20DSRP201A	2022-23	<ol style="list-style-type: none"> <li>1. Recognize the various disciplines that contribute to a successful data science effort. and Understand the processes of data science identifying the problem to be solved, data collection, preparation, modeling, evaluation and visualization.</li> <li>2. Be aware of the challenges that arise in data sciences.</li> <li>3. Develop an appreciation of the many techniques for data modeling and mining.</li> <li>4. Be cognizant of ethical issues in many data science tasks.</li> <li>5. Be comfortable using commercial and open source tools such as the R language and its associated libraries for data analytics and visualization.</li> </ol>
II DATA SCIENCE	III	OOPs with JAVA	DSOJ301	2019-20	<ol style="list-style-type: none"> <li>1. To learn Object-Oriented programming concepts and techniques using the Java programming language.</li> <li>2. To learn to write, test, and debug introductory level Object-Oriented programs using Java. In addition, the student will be introduced to the following concepts, which are important</li> </ol>

					<p>workforce activities:</p> <ol style="list-style-type: none"> <li>3. Design/Develop Program</li> <li>4. Design classes ,interfaces, packages</li> <li>5. Design the applet programs</li> <li>6. Understanding Inheritance.</li> </ol>
II B.Sc. (DATA SCIENCE)	III	DATA MINING AND DATA ANALYSIS	DSDMD301	2019-20	<ol style="list-style-type: none"> <li>1. Compare various conceptions of data mining as evidenced in both research and application.</li> <li>2. Characterize the various kinds of patterns that can be discovered by association rule mining.</li> <li>3. Evaluate mathematical methods underlying the effective application of data mining.</li> </ol>
II IOT	III	PROGRAMING WITH PYTHON	IOTOP301	2019-20	<ol style="list-style-type: none"> <li>1. To understand the Basics of python language and Python IDLE.</li> <li>2. To gain problem solving capability.</li> <li>3. To Install and run python Interpreter.</li> <li>4. To gain knowledge about different data types and operators.</li> <li>5. To use and explore control structures and loop constructs in python.</li> <li>6. To understand and create built in and user defined datatypes.</li> <li>7. To identify the various form of input and output statements and its purposes</li> <li>8. To import and create arrays using array module.</li> </ol>

					<p>9. To insert predefined functions and operations on array.</p> <p>10. To understand the basics of numpy module and importing the functions from numpy module.</p> <p>11. To gain knowledge about multidimensional array and its link with numpy module.</p> <p>12. To understand and use the concept declaring functions and returning results from a function.</p> <p>13. To explore the use of Lambdas, List, Tuples.</p>
II Data Science	IV	Advanced Java	DSAJ401	2019-20	<p>1. To understand the meaning and basic components of servlets and JSP</p> <p>2. To know the required software to run Java programs</p> <p>3. Understanding the use of servers</p> <p>4. Understanding the use of Jsp</p> <p>5. Understanding the use of Databases</p>
II DATA SCIENCE	IV	DATA PROCESSING & VISUALIZATION	DS-CSC402	2020-2021	<p>1. proficiently navigate Tableau using a full suite of commands</p> <p>2. analyse data and calculate with tables using Tableau commands</p> <p>3. generate the most meaningful visualisations</p> <p>4. develop interactive dashboards</p> <p>deliver insightful stories visually in addressing a business problem.</p>
II BSc(Data	IV	DATABASE	DSDBMS403	2021-2022	<p>1. Gain knowledge of Database and DBMS.</p>

Science)		MANAGEMENT SYSTEMS			<ol style="list-style-type: none"> <li>2. Understand the fundamental concepts of DBMS with special emphasis on relational data model.</li> <li>3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database</li> <li>4. Model database using ER Diagrams and design database schemas based on the model.</li> <li>5. Create a small database using SQL.</li> <li>6. Store, Retrieve data in database.</li> </ol>
B.Sc (Data Science)	IV	ARTIFICIAL INTELLIGENCE	DSAI404	2021-2022	<ol style="list-style-type: none"> <li>1. Find appropriate idealizations for converting real world problems into AI search problems formulated using the appropriate search algorithm. .</li> <li>2. Implement CNN</li> <li>3. Implement RNN.</li> <li>4. It is expected that the students to apply techniques to design expert systems.</li> <li>5. Understand the Basic Concepts</li> </ol>
II IOT	IV	PROGRMING WITH 'R'	IOTPR401	2019-20	<ol style="list-style-type: none"> <li>1. List motivation for learning a programming language</li> <li>2. Access online resources for R and import new function packages into the R workspace</li> <li>3. Import, review, manipulate and summarize data-sets in R</li> <li>4. Explore data-sets to create testable hypotheses and identify</li> </ol>

					<p>appropriate statistical tests</p> <p>5. Perform appropriate statistical tests using R Create and edit visualizations with</p>
II BSc(IoT)	IV	DATABASE MANAGEMENT SYSTEMS	IOTDBMS402	2021-2022	<p>1. Gain knowledge of Database and DBMS.</p> <p>2. Understand the fundamental concepts of DBMS with special emphasis on relational data model.</p> <p>3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database</p> <p>4. Model database using ER Diagrams and design database schemas based on the model.</p> <p>5. Create a small database using SQL.</p> <p>6. Store, Retrieve data in database.</p>
III DATA SCIENCE / III IOT	V	Machine Learning	R20DSML5 01 / R20IOTML 501	2022-2023	<p>1. Domain Knowledge for Productive use of Machine Learning and Diversity of Data.</p> <p>2. Demonstrate on Supervised and Computational Learning</p> <p>3. Analyze on Statistics in learning techniques and Logistic Regression</p> <p>4. Illustrate on Support Vector Machines and Perceptron Algorithm</p> <p>5. Design a Multilayer Perceptron Networks and classification of decision tree</p>
III Data	V	PHP & MySQL	R20DSPHP	2022-2023	<p>1. To understand the meaning and basic components of PHP</p>

Science/ III IoT			502/ R20IOTPH P502		<ol style="list-style-type: none"> <li>2. To know the required software to run PHP programs</li> <li>3. Understanding the use of servers and predefine databases</li> <li>4. To design front end applications</li> <li>5. To design web applications</li> </ol>
B.Sc (Data Science)	V	Big Data Technology	R20DSBT503	2022- 2023	<ol style="list-style-type: none"> <li>1. Learn tips and tricks for Big Data use cases and solutions.</li> <li>2. Learn to build and maintain reliable, scalable, distributed systems with Apache Hadoop.</li> <li>3. Able to apply Hadoop ecosystem components.</li> <li>4. Understand dabase concept</li> <li>5. Maintain website data.</li> </ol>
B.Sc (Data Science)	V	PYTH ON PROGRA MING	R20DSPP5 04	2022- 2023	<ol style="list-style-type: none"> <li>1. To understand the Basics of python language and Python IDLE.</li> <li>2. To gain problem solving capability.</li> <li>3. To Install and run python Interpreter.</li> <li>4. To gain knowledge about different data types and operators.</li> <li>5. To use and explore control structures and loop constructs in python.</li> <li>6. To understand and create built in and user defined datatypes.</li> <li>7. To identify the various form of input and output statements and its purposes</li> <li>8. To import and create arrays using array module.</li> </ol>

					<ol style="list-style-type: none"> <li>9. To insert predefined functions and operations on array.</li> <li>10. To understand the basics of numpy module and importing the functions from numpy module.</li> <li>11. To gain knowledge about multidimensional array and its link with numpy module.</li> <li>12. To understand and use the concept declaring functions and returning results from a function.</li> <li>13. To explore the use of Lambdas, List, Tuples.</li> </ol>
B.Voc [Web Technology & Software Development]	I	Computer Fundamentals& MS Office	R20WSCSC101A	2022-2023	<ol style="list-style-type: none"> <li>1. To understand the fundamentals of computers.</li> <li>2. To learn about memory and its types.</li> <li>3. To learn different number systems and their conversions.</li> <li>4. To learn about operating system, its functions and its types.</li> <li>5. To understand the concepts of MS Word, Excel, PowerPoint concepts.</li> </ol>
B.Voc [Web Technology & Software Development]	I	Computer Organization	R20WSCO101A	2022-2023	<ol style="list-style-type: none"> <li>1. Understand the basics of computer hardware and how software interacts with computer hardware and Analyze and evaluate computer performance</li> <li>2. Understand how computers represent and manipulate data and Understand computer arithmetic and convert between different number systems</li> <li>3. Assemble a simple computer with hardware design including</li> </ol>

					<p>data format, instruction format, instruction set, addressing modes, bus structure, input/output, memory, arithmetic/logic unit, control unit, and data, instruction and address flow</p> <ol style="list-style-type: none"> <li>4. Use Boolean algebra as related to designing computer logic, through simple combinational and sequential logic circuits</li> <li>5. The course emphasizes performance and cost analysis, memory technology, memory hierarchy, virtual memory management, and i/o systems.</li> </ol>
B.VOC[IT&IT eS]	I	Introduction to 'C' Language	R20ITCP101A	2022-2023	<ol style="list-style-type: none"> <li>1. To learn about data types and operators.</li> <li>2. To learn about decision making statements and functions</li> <li>3. To learn how to work with arrays and strings and structures.</li> <li>4. To understand character arrays and concept of pointers.</li> <li>5. To understand the concept of files.</li> </ol>
I B.VOC WT &SD	I	HTML & CSS	R20WSHC101 A	2022-2023	<ol style="list-style-type: none"> <li>1. Analyze a web page and identify its elements and attributes.</li> <li>2. Create web pages using XHTML and Cascading Style Sheets.</li> <li>3. Build dynamic web pages using JavaScript (Client side programming).</li> <li>4. Create XML documents and Schemas.</li> </ol> <p>Develop web pages using the HTML and CSS features with different layouts as per need of applications and Students are</p>

					able to develop a dynamic webpage by the use of java script and DHTML.
B.Voc(Web Technologies & Software Development)	II	ANGULAR-JS	R20WSAJS201 A	2022-23	<ol style="list-style-type: none"> <li>1. To create web applications.</li> <li>2. To Angular JS to facilitate development of single-page web applications that use the Model-View-Controller (MVC) design pattern.</li> <li>3. Reduce the amount of code you write to build rich user interface applications.</li> <li>4. Retrieve data from back-end server, manipulate it and display it with ease.</li> <li>5. Modularise your code with the custom services and directives.</li> </ol>
B.VOC [WEB TECHNOLOGY]	II	'C' Programming	R20WSCP201 A	2022-23	<ol style="list-style-type: none"> <li>1. To learn about data types and operators.</li> <li>2. To learn about decision making statements and functions.</li> <li>3. To learn how to work with arrays and strings.</li> <li>4. To learn about structures.</li> <li>5. To understand the concept of pointers.</li> </ol>
B.VOC [WEB TECHNOLOGY]	II	Data Communications	R20WSDC201 A	2022-23	<ol style="list-style-type: none"> <li>1. Introduce students to the evolution of computer networks and the concepts data communication</li> <li>2. introduce students the general principles of network design and compare the different network topologies;</li> <li>3. introduce students to the digital and analogue representations</li> </ol>

					<p>and channels; • describe the mechanism and techniques of encoding;</p> <p>4. introduce students to the general principles of circuit and packet switching;</p> <p>5. introduce students to the wireless Local Area Networks;</p>
BVoc(IT & ITeS)	III	PYTHON PROGRAMING	ITPP301	2020-21	<ol style="list-style-type: none"> <li>1. To understand the Basics of python language and Python IDLE.</li> <li>2. To gain problem solving capability.</li> <li>3. To Install and run python Interpreter.</li> <li>4. To gain knowledge about different data types and operators.</li> <li>5. To use and explore control structures and loop constructs in python.</li> <li>6. To understand and create built in and user defined datatypes.</li> <li>7. To identify the various form of input and output statements and its purposes</li> <li>8. To import and create arrays using array module.</li> <li>9. To insert predefined functions and operations on array.</li> <li>10. To understand the basics of numpy module and importing the functions from numpy module.</li> <li>11. To gain knowledge about multidimensional array and its link with numpy module.</li> </ol>

					<p>12. To understand and use the concept declaring functions and returning results from a function.</p> <p>13. To explore the use of Lambdas, List, Tuples.</p>
<p>BVoc(IT &amp;ITeS) BVoc(WT &amp; SD)</p>	III	E-Commerce	<p>ITCSCEC3 02 / WSCSCE C302</p>	2020-21	<p>1. Analyze the impact of E-commerce on business models and strategy.</p> <p>2. Describe the major types of E-commerce.</p> <p>3. Explain the process that should be followed in building an E-commerce presence.</p> <p>4. Identify the key security threats in the E-commerce environment.</p> <p>5. Describe how procurement and supply chains relate to B2B E-commerce.</p>
<p>B.Voc(IT &amp;ITeS)</p>	III	HTML & ANGULAR -JS	<p>ITCSHAJ30 3</p>	2020-21	<p>1. To create web applications .AngularJS to facilitate development of single-page web applications that use the Model- View- Controller (MVC) design pattern.</p> <p>2. Referencing AngularJS in a Web page</p> <p>3. Building Single Page Applications using AngularJS</p> <p>4. Integrating forms with AngularJS</p> <p>5. Extending AngularJS with custom directives, filters and service</p>
<p>B.VOC [WT &amp;</p>	III	PROGRAMING IN JAVA	<p>WSCSCPJ30 1</p>	2020-21	<p>1. To learn Object-Oriented programming concepts and techniques using the Java programming language. To learn to write, test,</p>

SDJ]					<p>and debug introductory level Object-Oriented programs using Java. In addition, the student will be introduced to the following concepts, which are important workforce activities:</p> <ol style="list-style-type: none"> <li>2. Design/Develop Program</li> <li>3. Design classes</li> <li>4. Design interfaces, packages</li> <li>5. Design the applet programs</li> <li>6. Understanding Inheritance.</li> </ol>
B.Voc (WT&SD)	III	Advanced Angular-JS	WSCSC A JS303	2020- 2021	<ol style="list-style-type: none"> <li>1. Using directives and components to define UI elements, routes and screens</li> <li>2. Working effectively with component lifecycle events</li> <li>3. Injecting dependencies to lessen coupling and increase testability</li> <li>4. Building Single Page Applications using Angular</li> <li>5. Integrating forms with Angular</li> <li>6. Organizing code using modules</li> </ol>
II BVoC WT/ II IT&ITeS	IV	Advanced Java	WTSD- CSC401/ ITES-CSC401	2020-21	<ol style="list-style-type: none"> <li>1. To understand the meaning and basic components of servlets and JSP</li> <li>2. To know the required software to run Java programs</li> <li>3. Understanding the use of servers</li> <li>4. Understanding the use of Databases</li> </ol>

					5. Design website
II BVoC WT	IV	R-LANGUAGE	WTSD- CSC402	2020-21	<ol style="list-style-type: none"> <li>1. List motivation for learning a programming language</li> <li>2. Access online resources for R and import new function packages into the R workspace</li> <li>3. Import, review, manipulate and summarize data-sets in R</li> <li>4. Explore data-sets to create testable hypotheses and identify appropriate statistical tests</li> <li>5. Perform appropriate statistical tests using R Create and edit visualizations with</li> </ol>
II BVoC IT & II BVoC WT	IV	Software Engineering	WTSD- CSC403/ ITES-CSC403	2020-21	<ol style="list-style-type: none"> <li>1. The ability to analyse, design, verify, validate, implement, apply and maintain software systems.</li> <li>2. The ability to work in one or more significant application domains</li> <li>3. The ability to manage the development, measuring using Size &amp; Function Oriented Metrics</li> <li>4. The ability to understand the analysis model with its elements and designing with its models</li> </ol> <p>The ability to understand the concepts of Quality and Testability</p>
II B.Voc IT&ITeS	IV	Advanced Angular-JS	ITES- CSC402	2020- 2021	<ol style="list-style-type: none"> <li>1. Using directives and components to define UI elements, routes and screens</li> <li>2. Working effectively with component lifecycle events</li> </ol>

					<ol style="list-style-type: none"> <li>3. Injecting dependencies to lessen coupling and increase testability</li> <li>4. Building Single Page Applications using Angular</li> <li>5. Integrating forms with Angular</li> <li>6. Organizing code using modules</li> </ol>
III B.VOC(WT&S D)	V	CONTENT MANAGEMENT SYSTEM	R20WT501	2021-22	<ol style="list-style-type: none"> <li>1. Define the purpose of using CMS for digital content development and publication management</li> <li>2. Evaluate the functional roles in a CMS</li> <li>3. Evaluate the considerations to be taken into account in the acquisition of a CMS</li> <li>4. Evaluate the considerations to be taken into account in content modelling</li> <li>5. Evaluate the considerations to be taken into account in content aggregation</li> <li>6. A content management system helps you create, manage, and publish content on the web.</li> <li>7. It also helps keep content organized and accessible so it can be used and repurposed effectively.</li> <li>8. There are various kinds of content management systems</li> </ol>

					available—from cloud-based to a headless CMS—to meet every audience need.
III B.VOC(WT&S D)	V	PHP	R20WT502	2021-2022	<ol style="list-style-type: none"> <li>1. To understand the meaning and basic components of PHP</li> <li>2. To know the required software to run PHP programs</li> <li>3. Understanding the use of servers and predefine databases</li> <li>4. Understanding the database</li> <li>5. Creating web site.</li> </ol>
III B.VOC(WT&S D)	V	DATABASE MANAGEMENT SYSTEMS	R20WT503	2021-2022	<ol style="list-style-type: none"> <li>1. Gain knowledge of Database and DBMS.</li> <li>2. Understand the fundamental concepts of DBMS with special emphasis on relational data model.</li> <li>3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database</li> <li>4. Model database using ER Diagrams and design database schemas based on the model.</li> <li>5. Create a small database using SQL.</li> <li>6. Store, Retrieve data in database.</li> </ol>
III B.VOC(WT&S D)	V	React JS	R20WT504	2021-2022	<ol style="list-style-type: none"> <li>1. Components. Gain insights into components, building blocks of a React app; build and compose reusable components.</li> <li>2. JSX. ...</li> <li>3. State. ...</li> </ol>

					<ol style="list-style-type: none"> <li>4. Network requests. ...</li> <li>5. Isomorphic applications. ...</li> <li>6. Master Redux. ...</li> <li>7. Test-driven development. ...</li> <li>8. Build efficient forms.</li> </ol>
III B.VOC(WT&S D)	VI	DATA STRUCTURES	R20WT601	2021-2022	<ol style="list-style-type: none"> <li>1. Ability to analyze algorithms and algorithm correctness.</li> <li>2. Ability to summarize searching and sorting techniques</li> <li>3. Ability to describe stack, queue and linked list operation.</li> <li>4. Ability to have knowledge of tree and graphs concepts</li> </ol>
III B.VOC(WT&S D)	VI	.Net Programming	R20WT602	2021-2022	<ol style="list-style-type: none"> <li>1. Create, compile and run object-oriented C# programs using Visual Studio</li> <li>2. Write and understand C# language constructs, syntax and semantics</li> <li>3. Develop reusable .NET components via interface realization and standard design patterns.</li> <li>4. Develop a web based application with all validations.</li> <li>5. Leverage the major namespaces and classes of the .NET Framework</li> <li>6. Access databases using Language Integrated Query (LINQ)</li> </ol>
III	VI	Django	R20WT603	2021-2022	<ol style="list-style-type: none"> <li>1. How to create routes (or views) with Django .</li> </ol>

B.VOC(WT&S D)					<ol style="list-style-type: none"> <li>2. How to serve static content and files using Django .</li> <li>3. How to connect templates with models to serve data dynamically.</li> <li>4. How to create Models and how to connect them with Templates and Views.</li> <li>5. How to work with databases using SQLite.</li> </ol>
III B.VOC(WT&S D)	VI	Mobile Development Application	R20WT604	2021-2022	<ol style="list-style-type: none"> <li>1. Identify various concepts of mobile programming that make it unique from programming for other platforms,</li> <li>2. Critique mobile applications on their design pros and cons,</li> <li>3. Utilize rapid prototyping techniques to design and develop sophisticated mobile interfaces,</li> <li>4. Program mobile applications for the Android operating system that use basic and advanced phone features, and</li> <li>5. Deploy applications to the Android marketplace for distribution.</li> </ol>
I BCom(comp)	I	INFORMATION TECHNOLOGY	R20COMC103 A	2022-23	<ol style="list-style-type: none"> <li>1. Recognize when to use each of the Microsoft Office programs to create professional documents</li> <li>2. Recognize when to use each of the Microsoft Office programs to create academic documents</li> <li>3. Use Microsoft Office programs to create personal, academic and business documents following current professional and/or</li> </ol>

					<p>industry standards.</p> <ol style="list-style-type: none"> <li>4. Apply skills and concepts for basic use of computer hardware, software, networks, and the Internet in the workplace</li> <li>5. in future coursework as identified by the internationally accepted Internet and Computing Core (IC3) standards.</li> </ol>
I BCOM COMP	II	E- COMMERCE&WE B DESIGNING	R20COMC203 A	2022-23	<ol style="list-style-type: none"> <li>1. Insert a graphic, table, form, links within a web page.</li> <li>2. Use cascading style sheets.</li> <li>3. Create and validate a web page and Ability to build a website.</li> <li>4. Use operators, variables, arrays, control structures, functions and objects in JavaScript.</li> <li>5. Use regular expressions for form validation.</li> </ol>
II B.Com (Computers):	III	Programming with C & C++	R20BCOMP30 1	2021-2022	<ol style="list-style-type: none"> <li>1. Develop programming skills</li> <li>2. Declaration of variables and constants use of operators and expressions</li> <li>3. learn the syntax and semantics of programming language</li> <li>4. Be familiar with programming environment of C and C++</li> <li>5. Ability to work with textual information (characters and strings) &amp; arrays</li> <li>6. Understanding a functional hierarchical code organization</li> <li>7. Understanding a concept of object thinking within the framework of functional model</li> </ol>

					<ol style="list-style-type: none"> <li>8. Write program on a computer, edit, compile, debug, correct, recompile and run it</li> <li>9. Choose the right data representation formats based on the requirements of the problem</li> <li>10. Analyze how C++ improves C with object-oriented features</li> <li>11. Evaluate comparisons and limitations of the various programming constructs and choose correct one for the task in hand.</li> <li>12. Exploring C programming and Design C++ classes for code reuse (Practical skills***)</li> </ol>
II B.COM(COM PUTERS)	IV	Data Base Management System	R20BCOMP40 1	2021-2022	<ol style="list-style-type: none"> <li>1. Understand the role of a database management system in an organization.</li> <li>2. Understand basic database concepts, including the structure and operation of the relational data model.</li> <li>3. Understand and successfully apply logical database design principles, including E-R diagrams and database normalization</li> <li>4. Understand Functional Dependency and Functional Decomposition</li> <li>5. <i>Explains (Understanding*)</i></li> <li>6. To design and build a simple database system and demonstrate</li> </ol>

					<p>competence with the fundamental tasks involved with modeling, designing, and implementing a DBMS.</p> <p>7. Perform PL/SQL programming using concept of Cursor Management, Error Handling, Packages</p> <p>8. <i>Critically examines, using data and figures (Analysis and Evaluation**)</i></p> <p>9. Apply various Normalization techniques</p> <p>10. Model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model</p>
II B.Com(computers)	IV	Object Oriented Programming with Java	R20BCOMP40 2	2021-2022	<p>1. Understanding the meaning and necessity of audit in modern era</p> <p>2. Comprehend the role of auditor in avoiding the corporate frauds</p> <p>3. Identify the steps involved in performing audit process</p> <p>4. Determine the appropriate audit report for a given audit situation</p> <p>5. Apply auditing practices to different types of business entities</p> <p>6. Plan an audit by considering concepts of evidence, risk and materiality</p>
III B.Com(Computers)	V	MOBILE APPLICATION DEVELOPMENT	R20BBCOMP5 01	2022-23	<p>1. Identify basic terms, tools and software related to android systems</p> <p>2. Describe components of IDE, understand features of android development tools</p>

					<ol style="list-style-type: none"> <li>3. Describe the layouts and controls</li> <li>4. Explain the significance of displays using the given view</li> <li>5. Explain the features of services and able to publish android Application</li> <li>6. Developing interesting Android applications using MIT App Inventor.</li> </ol>
III BCOM(COMP UTERS)	V	CYBER SECURITY AND MALWARE ANALYSIS	R20BBCO MP502	2022-2023	<ol style="list-style-type: none"> <li>1. Understand the computer networks, networking tools and cyber security</li> <li>2. Learn about NIST Cyber Security Framework</li> <li>3. Understand the OWASP Vulnerabilities</li> <li>4. Implement various Malware analysis tools</li> <li>5. Understand about Information Technology act 2000</li> </ol>
I.BCOM(GEN. LOG), BBA, B.Sc (MPC,CBZ)	I	COMPUTER APPLICATIONS	R20LSC 101CS	2020-2021	<ol style="list-style-type: none"> <li>1. Demonstrate basic understanding of computer hardware and software.</li> <li>2. Apply skills and concepts for basic use of a computer.</li> <li>3. Identify appropriate tool of MS office to prepare basic documents, charts, spreadsheets and presentations.</li> <li>4. Create personal, academic and business documents using MS office.</li> <li>5. Create spreadsheets, charts and presentations. And Analyze data using charts and spread sheets.</li> </ol>

I.BCOM(GEN,TP,LOG), BBA, B.Sc(MPC,CBZ)	II	INFORMATION & COMMUNICATION TECHNOLOGY	R20LSC201CS	2020-2021	<ol style="list-style-type: none"> <li>1. Understand the literature of social networks and their properties and Explain which network is suitable for whom.</li> <li>2. Develop skills to use various social networking sites like twitter, flickr, etc.</li> <li>3. Learn few GOI digital initiatives in higher education.</li> <li>4. Apply skills to use online forums, docs, spreadsheets, etc for communication, collaboration and research.</li> <li>5. Get acquainted with internet threats and security mechanisms.</li> </ol>

### DEPARTMENT OF CHEMISTRY

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.Sc (MPC, CBZ and MCCS)	I	Inorganic and Physical Chemistry	R20CHE101A	2022-23	<ul style="list-style-type: none"> <li>➤ Understand the structure and preparation of boron, silicon, nitrogen, phosphorous, sulphur and halogen compounds.</li> <li>➤ The students could able to know the electronic configuration of d-block elements and its effect on colour and magnetic properties. Catalytic properties of d-block elements its industrial applications. → The students could able to know the conductors and semiconductors.</li> <li>➤ The students could able to know the conductors and semiconductors.</li> <li>➤ Recognises the difference between d- block elements and f-block elements, Lanthanide contraction and its consequences, Colour properties, Lanthanides separation.</li> <li>➤ Students will be in a position to apply the concepts of the topic in various scientific</li> </ul>

					<p>situations, say, conductivity of crystals due to crystal defects etc.</p> <ul style="list-style-type: none"> <li>➤ Ability to differentiate between real and ideal gases. Also, they will be in a position to explain why only real gases show Joule- Thomson effect and why only real gases can be liquefied. Learning 'Liquid state' makes them aware of classification of liquid crystals and will be in a position to explain the functioning of LCD.</li> <li>➤ Make the students aware of all the fundamental concepts of Solutions, and its applications such as isotonic solutions, azeotropic mixtures etc.</li> </ul>
I B.Sc (MPC, CBZ and MCCS)	II	Organic and General Chemistry	R20Che201A	2022-23	<ul style="list-style-type: none"> <li>➤ Students are expected to know the differences between alkaes, methods of synthesis, chemical properties, various types of strains involved in the cyclic hydrocarbons and their effect on their geometry and chemical properties, theories of strain such as Bayer's theory.</li> <li>➤ The student will demonstrate the chemical behavior of alkenes and alkynes by identifying properties of alkenes and alkynes, drawing the mechanism for alkene addition reactions, using Markovnikov's rule to predict the region specificity of several alkene addition reactions and Identifying and illustrating reactions of alkynes</li> <li>➤ Students are to be in a position to apply the concept of resonance in explaining different</li> </ul>

					<p>phenomena such as acidity, basicity of acids, phenols and amines. Also, they are expected to be in a position to explain the preference of electrophilic and nucleophilic substitutions for ortho, para or meta positions.</p> <ul style="list-style-type: none"> <li>➤ Students will have clear idea of all the concepts and will be in a position to apply the concepts in explaining water purification methods, colloidal medicines etc.</li> <li>➤ Student can explain most of the chemical phenomena in daily life.</li> <li>➤ This will make the students to understand how the three dimensional structure of molecules effect their chemical and physical properties. Also, they are in a position to explain the importance of stereochemistry in medicine.</li> </ul>
II B.Sc (MPC, CBZ and MCCS)	III	Organic Chemistry and Spectroscopy	R20CHE301	2021-22	<ul style="list-style-type: none"> <li>➤ Acquires knowledge on halogen derivatives of organic compounds, Types of organic reactions, Importance of stereochemistry in the organic reactions especially in substitution reactions.</li> <li>➤ Able to differentiate alcohols and phenols, able to write preparative methods for alcohols and phenols.</li> <li>➤ Distinguishes between different carbonyl compounds, able to write preparation methods of carbonyl compounds, Synthetic importance of base catalysed reactions.</li> </ul>

					<ul style="list-style-type: none"> <li>➤ Able to describe the importance of carbanion in the organic synthesis, write the synthetic applications of malonic ester and acetoacetic ester.</li> <li>➤ Names the carboxylic acids according to IUPAC, describes the acidity, write the methods of preparation and reactivity.</li> <li>➤ Students will be able to apply Beer- Lambert law for quantitative determinations. Able to know the modes of vibrations in organic molecules. → Able to identify type of functional group present in the organic molecules. → Able to learn the magnetic behaviour of <math>^1\text{H}</math> and elucidation of structures of organic compounds by using <math>^1\text{H}</math>-NMR data.</li> <li>➤ Able to identify the type of conjugation in organic molecules and effect of conjugation on colour of the compounds.</li> </ul>
II B.Sc (MPC, CBZ and MCCS)	IV	Inorganic, Organic and Physical Chemistry	R20CHE401	2021-22	<ul style="list-style-type: none"> <li>➤ Students should be able to realize the potential applications of Organometallic compounds in the synthesis of various chemicals and polymers of day today use both in micro scale macro scale.</li> <li>➤ Describe and recognize the basic and ring structures of glucose and fructose and their conversions.</li> <li>➤ Predict the different type of amino acids and recognize the basic properties of amino acids.</li> </ul>

					<ul style="list-style-type: none"> <li>➤ The student will learn nomenclature, structure, properties, syntheses, and reactions of the simple 5 and 6-membered ring heterocyclics.</li> <li>➤ Able to understand the nomenclature of nitro hydrocarbons, tautomerism in nitro hydrocarbons.</li> <li>➤ Students understand the nomenclature of amines, Basicity of amines, comparison of basicity, separation of amines. Chemical properties of amines.</li> <li>➤ Understand difference between thermal and photochemical reactions, laws of photochemistry, quantum yield and types of photochemical reactions.</li> <li>➤ Able to learn the different types of thermodynamic systems, reaction energies, feasibility of the chemical reactions, entropy and its significance.</li> </ul>
II B.Sc (MPC, CBZ and MCCS)	IV	Inorganic and Physical Chemistry	R20CHE402	2021-22	<ul style="list-style-type: none"> <li>➤ Students able to learn the bonding in the coordinate compounds, stability, colour and magnetic properties, Learn the CFSE calculations, Isomerism in complex compounds.</li> <li>➤ Able to know the stability and reactivity of the complexes, labile and inert complexes, methods for determination of composition of the complexes and calculation of magnetic moment.</li> <li>➤ Students could able to learn the applications of</li> </ul>

					<p>phase rule in metallurgy, desilverisation of lead.</p> <ul style="list-style-type: none"> <li>➤ Student could able differentiate strong electrolytes and weak electrolytes, determine the transport numbers able to calculate the EMF of the given cell.</li> <li>➤ Apply experimental techniques to the determination of rate laws and rate constants.</li> </ul>
III B.Sc (MPC, CBZ and MCCS)	V/VI	Synthetic Organic Chemistry	R20CHEA501/ R20CHEA601	2022-23	<ul style="list-style-type: none"> <li>➤ Able to analyse the mode of activation of a pericyclic reaction.</li> <li>➤ Understand the concept of organic photochemistry with different processes and terminologies and know about the photochemical reactions of carbonyl compounds.</li> <li>➤ Know about the synthesis of some simple molecules using disconnection approach.</li> <li>➤ Understand the formation of C-C bonds through coupling reactions.</li> <li>➤ Able to understand the different types of reagents used for oxidation and reduction reactions.</li> </ul>
III B.Sc (MPC, CBZ and MCCS)	V/VI	Synthetic Organic Chemistry	R20CHEA502/ R20CHEA602	2022-23	<ul style="list-style-type: none"> <li>➤ Do fragmentation pattern (analysis) of organic molecules by using mass spectrometry.</li> <li>➤ Analysis of organic molecules by IR, NMR and Mass spectroscopic techniques.</li> <li>➤ Student could able to acquire some basic knowledge of Chromatographic techniques like TLC, Paper, Column and HPLC.</li> </ul>

					<ul style="list-style-type: none"> <li>➤ Can apply these techniques for the separation of mixture of organic or inorganic compounds.</li> <li>➤ Develops the extraction techniques for organic molecules from plant materials</li> </ul>

**DEPARTMENT OF PHYSICS & ELECTRONICS**

**PHYSICS:**

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
B.Sc. MPCS	I	Mechanics, Waves & Oscillations	R20PHY101A	2022-2023	<ul style="list-style-type: none"> <li>✓ Understand Newton's laws of motion and motion of variable mass system and its application to rocket motion and the concepts of impact parameter, scattering cross section.</li> <li>✓ Apply the rotational kinematic relations, the principle and working of gyroscope and its applications and the precessional motion of a freely rotating symmetric top.</li> <li>✓ Comprehend the general characteristics of central forces and the application of Kepler's laws to describe the motion of planets and satellite in circular orbit through the study of law of Gravitation.</li> <li>✓ Understand postulates of Special theory of relativity and its consequences such as length contraction, time dilation, relativistic mass and mass-energy equivalence.</li> <li>✓ Figure out the formation of harmonics and overtones in a stretched string and acquire the</li> </ul>

					knowledge on Ultrasonic waves, their production and detection and their applications in different fields.
B.Sc. MPCS	II	Wave Optics	R20PHY201A	2022-2023	<ul style="list-style-type: none"> <li>✓ Understand the phenomenon of interference of light and its formation in (i) Lloyd's single mirror due to division of wave front and (ii) Thin films, Newton's rings and Michelson interferometer due to division of amplitude.</li> <li>✓ Distinguish between Fresnel's diffraction and Fraunhofer diffraction and observe the diffraction patterns in the case of single slit and the diffraction grating.</li> <li>✓ Understand the various methods of production of plane, circularly and polarized light and their detection and the concept of optical activity.</li> <li>✓ Comprehend the basic principle of laser, the working of He-Ne laser and Ruby lasers and their applications in different fields.</li> <li>✓ Understand the basic principles of fibre optic communication and explore the field of Holography and Nonlinear optics and their applications.</li> </ul>
B.Sc. MPC & MPCS	III	HEAT & THERMODYNAMICS	R20PHY301	2021-22	<ul style="list-style-type: none"> <li>✓ Understand the basic aspects of kinetic theory of gases, Maxwell-Boltzmann distribution law, equipartition of energies, mean free path of molecular collisions and the transport phenomenon in ideal gases.</li> </ul> <p>2. Gain knowledge on the basic concepts of</p>

					<p>thermodynamics, the first and the second law</p> <ul style="list-style-type: none"> <li>✓ of thermodynamics, the basic principles of refrigeration, the concept of entropy ,the Thermodynamic potentials and their physical interpretations.</li> <li>✓ Understand the working of Carnot's ideal heat engine, Carnot cycle and its efficiency.</li> <li>✓ Develop critical understanding of concept of Thermodynamic potentials, the formulation of Maxwell's equations and its applications.</li> <li>✓ Examine the nature of black body radiations and the basic theories.</li> </ul>
B.Sc. MPC & MPCS	IV	Electricity, Electromagnetism & Electronics	R20PHY401	2021-22	<ul style="list-style-type: none"> <li>✓ Understand the Gauss law and its application to obtain electric field in different cases and formulate the relationship between electric displacement vector, electric polarization, Susceptibility, Permittivity and Dielectric constant.</li> <li>✓ Apply the knowledge of Gauss's law to derive relations connecting dielectric Parameters and their applications.</li> <li>✓ Understand Biot and Savart's law and Ampere's circuital law to describe and explain the generation of magnetic fields by electrical currents.</li> <li>✓ Develop an understanding on the unification of electric and magnetic fields and Maxwell's equations governing electromagnetic waves.</li> </ul>

					<ul style="list-style-type: none"> <li>✓ Understand the operation of basic logic gates and universal gates and their truth tables.</li> </ul>
B.Sc. MPC & MPCS	IV	MODERN PHYSICS	R20PHY402	2021-22	<ul style="list-style-type: none"> <li>✓ Develop an understanding on the concepts of Atomic and Modern Physics, basic elementary quantum mechanics and nuclear physics.</li> <li>✓ Develop critical understanding of concept of Matter waves and Uncertainty principle.</li> <li>✓ Get familiarized with the principles of quantum mechanics and the formulation of Schrodinger wave equation and its applications.</li> <li>✓ Examine the basic properties of nuclei, characteristics of Nuclear forces, salient features of nuclear models and different nuclear radiation detectors.</li> <li>✓ Get familiarized with the Nano materials, their unique properties and applications.</li> </ul>
B.Sc. MPC & MPCS	V & VI	APPLICATIONS OF ELECTRICITY & ELECTRONICS	R20PHYC501/ R20PHYC601	2022-23	<ul style="list-style-type: none"> <li>✓ Identify various components present in Electricity &amp; Electronics Laboratory.</li> <li>✓ Acquire a critical knowledge of each component and its utility (like resistors, capacitors, inductors, power sources etc.).</li> <li>✓ Demonstrate skills of constructing simple electronic circuits consisting of basic circuit elements.</li> <li>✓ Understand the need &amp; Functionality of various DC &amp; AC Power sources.</li> <li>✓ Comprehend the design, applications and practices of various electrical &amp; Electronic</li> </ul>

					devices and also their trouble shooting.
B.Sc. MPC & MPCS	V & VI	ELECTRONIC INSTRUMENTATION	R20PHYC502 / R20PHYC602	2022-23	<ul style="list-style-type: none"> <li>✓ Identify various facilities required to set up a basic Instrumentation Laboratory.</li> <li>✓ Acquire a critical knowledge of various Electrical Instruments used in the Laboratory.</li> <li>✓ Demonstrate skills of using instruments like CRO, Function Generator, Multimeter etc. through hands on experience.</li> <li>✓ Understand the Principle and operation of different display devices used in the display systems and different transducers.</li> <li>✓ Comprehend the applications of various biomedical instruments in daily life like B.P. meter, ECG, Pulse oxymeter etc. and know the handling procedures with safety and security.</li> </ul>

### ELECTRONICS & IoT:

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.SC MECS	I	CIRCUIT THEORY AND ELECTRONIC DEVICES	R20ELE101A	2022-23	<p>At the end of the course, the student will be able to</p> <p>CO1: Remember the concept of current &amp; voltage in circuits.</p> <p>CO2: Understand various Electrical networks by using principles of network theorems.</p> <p>CO3: Understand the behaviour of R, C network with DC &amp; sinusoidal excitation.</p> <p>CO4: Understand the behaviour of Inductor and its various states.</p>

					CO5: Apply the concept of Resonance & R, L, C network with variation of any one of it.
I B.SC MECS	II	DIGITAL ELECTRONICS	R20ELE201A	2022-23	CO1: Understand the binary number theory of digital circuits. CO2: Remember the concepts of Boolean algebra and have knowledge to analyse and design Combinational systems using standard gates and minimization methods (such as karnaugh maps). CO3: Remember various logical inputs of different IC- logic families. CO4: Apply and design flip-flops and latches for sequential systems composed of standard Sequential modules, such as counters and registers. CO5: Analyse design combinational systems composed of standard combinational modules, such as multiplexers and decoders and understand various data manipulation circuits.
II B.SC MECS	III	ANALOG CIRCUITS AND COMMUNICATION	R20ELE301	2021-22	CO1: Analyse important types of integrated circuits. CO2: Demonstrate the ability to design practical circuits that perform the desired operation. CO3: Use of different modulation and demodulation techniques used in analog communication. CO4: Identify and solve basic communication problems. CO5: Analyse transmitters and receiver circuits.
					CO1: Gain good knowledge on microprocessor and implement in practical

II B.SC MECS	IV	MICROPROCESSOR SYSTEMS	R20ELE401	2021-22	<p>applications</p> <p>CO2: Design system using memory chips and peripheral chips for 16 bit 8086 microprocessor.</p> <p>CO3: Understand and devise techniques for faster execution of instructions,</p> <p>CO4: Learn to understand speed of operations and performance of microprocessors.</p> <p>CO5: Understand multi core processor and its advantages.</p>
II B.SC MECS	IV	MICRO CONTROLLER AND INTERFACING	R20ELE402	2021-22	<p>CO1: Acquire knowledge about microcontrollers embedded processors and their applications.</p> <p>CO2: Understand the internal architecture and interfacing of different peripheral devices With Microcontrollers.</p> <p>CO3: Write the programs for microcontroller.</p> <p>CO4: Understand the role of embedded systems in industry.</p> <p>CO5: Understand the design concept of embedded systems.</p>
III BSC MECS	VI	INDUSTRIAL ELECTRONICS	R20ELEA601	2022-23	<p>Students after successful completion of the course will be able to:</p> <p>CO1: Identify various facilities required to set up a basic Instrumentation Laboratory.</p> <p>CO2: Acquire a critical knowledge of various Electrical Instruments used in the Laboratory.</p> <p>CO3: Demonstrate skills in using instruments like Rectifiers, Multimeters, Power supplies, Voltage Regulators etc. through</p>

					<p>hands-on experience.</p> <p>CO4: Understand the Principle and operation of different Electronic Heating devices.</p> <p>CO5: Design and analyse circuits containing digital components and microprocessors.</p>
III BSC MECS	VI	ELECTRONIC INSTRUMENTATION	R20ELEA602	2022-23	<p>Students after successful completion of the course will be able to:</p> <p>CO1: Identify various facilities required to set up a basic Instrumentation Laboratory.</p> <p>CO2: Acquire a critical knowledge of various Electrical Instruments used in the Laboratory.</p> <p>CO3: Demonstrate skills of using instruments like CRO, Function Generator, and Multimeter etc. through hands on experience.</p> <p>CO4: Understand the Principle and operation of different display devices used in the display systems and different transducers</p> <p>CO5: Comprehend the applications of various biomedical instruments in daily life like B.P.meter, ECG, Pulse oximeter etc. and know the handling procedures with safety and Security.</p>
I B.SC IOT	I	BASIC ELECTRICITY AND DEVICES	R20IOTELE101A	2022-23	<p>CO1: Analyses basic DC and AC electric circuits.</p> <p>CO2: Verify KCL, KVL, and maximum power transfer theorem (MPTT) and analyze the effects of open and short circuits in DC circuits.</p> <p>CO3: To apply the concept of Resonance &amp; R, L, C network with variation of any one of it.</p>

					<p>CO4: To understand the operation and V-I characteristics of FET MOSFET, SCR &amp; biasing of FET.</p> <p>CO5: Ability to understand operation and design aspects of rectifiers and regulators.</p>
I B.SC IOT	II	ANALOG ELECTRONICS & DATA ACQUISITION	R20IOTELE201A	2022-23	<p>CO1: Design &amp; Develop signal conditioning/sensing circuits for sensor interfaces</p> <p>CO2: Test different data loggers for their features</p> <p>CO3: Understand the basic building blocks of linear integrated circuits and its characteristics.</p> <p>CO4: Analyse the linear- non-linear and specialized applications of operational amplifiers.</p> <p>CO5: Understand the theory of ADC and DAC.</p>
II B.SC IOT	III	DIGITAL ELECTRONICS	R20IOTELE301	2021-22	<p>CO1: Create the appropriate truth table from a description of a combinational logic Function.</p> <p>CO2: Create a gate-level implementation of a combinational logic function described by a truth table using and/or/inverter gates, MUX'S or ROMs, and analyse its timing behaviour.</p> <p>CO3: Create a state transition diagram from a description of a sequential logic function and then convert the diagram into an implementation of a finite-state machine with the appropriate Combinational and sequential components.</p> <p>CO4: Evaluate combinational and sequential logic designs using various metrics: switching speed, throughput/latency, gate count and area, energy dissipation and power.</p>

					CO5: Properly incorporate synchronous and asynchronous memories into a circuit Design.
II B.SC IOT	IV	INTRODUCTION TO MICROPROCESSOR AND MICROCONTROLLER	R20IOTELE401	2021-22	CO1: Apply knowledge and demonstrate programming proficiency using the various addressing modes and data transfer instructions of the target microprocessor and microcontroller. CO2: Compare accepted standards and guidelines to select appropriate Microprocessor (8085 & 8086) and Microcontroller to meet specified performance requirements. CO3: Analyze assembly language programs; select appropriate assemble into machine a cross assembler utility of a microprocessor and microcontroller. CO4: Design electrical circuitry to the Microprocessor I/O ports in order to interface the processor to external devices. CO5: Evaluate assembly language programs and download the machine code that will provide solutions real-world control problems.
II B.SC IOT	IV	INTRODUCTION TO ARM MICROCONTROLLER	R20IOTELE402	2021-22	CO1: Understand the features of embedded systems, architecture of ARM7 and applications. CO2: Analyse and understand the instruction set and development tools of ARM. CO3: Analyse and understand the THUMB state and achieving competency in assembly programming of ARM. CO4: Understand the exception, interrupts and

					interrupt handling schemes. CO5: Understand the hardware and interfacing peripheral devices to LPC2148.
III B.SC IOT	V	Embedded Systems Design With Stm-32	R20IOTELEA501	2022-23	CO1: Understand the concept of embedded system, microcontroller, different components of microcontroller and their interactions. CO2: Get familiarized with programming environment to develop embedded solutions. CO3: Program ARM microcontroller to perform various tasks. CO4: Understand the key concepts of embedded systems such as I/O, timers, interrupts and interaction with peripheral devices. CO5: Understand the basic hardware components and their selection method based on the characteristics and attributes of an Embedded System.
III B.SC IOT	V	INTRODUCTION TO ARDUINO PROGRAMMING	R20IOTELEA502	2022-23	CO1: Familiar with Arduino environment and its applications. CO2: Able to understand Arduino programming with C++. CO3: Able to Design Smart systems applications. CO4: Able to understand about any new IDE, compiler, and MCU chip in Arduino compatible boards or similar types. CO5: Able to Understand the communication between smart phones and home appliances.
					CO1: Analyses the function of sensor in robot and

III B.SC IOT	V	Robotics And Its Applications	R20IOTA501	2022-23	design the robotic arm with various tools CO2: Demonstrate knowledge of industrial robots, characteristics, end effectors and actuators. CO3: Apply spatial transformation to obtain forward and inverse kinematics CO4: Describe working principle of various sensors and program different operations CO5: Appreciate applications of robots in industry.
III B.SC IOT	V	IOT Sensors & Communication protocols	R20IOTA502	2022-23	CO1: Design and develop IoT based sensor systems. CO2: Select IoT protocols and software. CO3: Evaluate the wireless technologies for IoT. CO4: Appreciate the need for IoT Trust and variants of IoT. CO5: Evaluate performance characteristics of different types of sensors.

DEPARTMENT OF COMMERCE & MANAGEMENT

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
B.Com. General TP Computers Logistics	I	Fundamentals of Accounting	R20COM101A	2022-23	<ul style="list-style-type: none"> <li>○ Develop the ability to use accounting concepts and principles</li> <li>○ Demonstrate the ability to use a basic accounting system to create (record, classify and summarize) the business transactions.</li> <li>○ To understand the entry of transactions in Double entry book keeping system and various</li> </ul>

					<p>books of accounts.</p> <ul style="list-style-type: none"> <li>○ Apply the use of the fundamental accounting equation to analyze the effect of business transactions in an organization</li> <li>○ Understand the nature and purpose of financial statement.</li> </ul>
<p>B.Com. General TP Computers Logistics</p>	<p>II</p>	<p>Business Organisation and Management</p>	<p>R20COM102A</p>	<p>2022- 23</p>	<ul style="list-style-type: none"> <li>○ Understand the basic concepts of business organizations</li> <li>○ Identify the factors involved in determining the formation of business units</li> <li>○ Apply the ethics of business in the ordinary trade</li> <li>○ Gain the knowledge on the applicability of the recent trends involved in various supporting institutions and secondary market</li> <li>○ To propagate awareness on the role of supporting institutions for business</li> </ul>
<p>B.Com. General TP Computers Logistics BBA BCA</p>	<p>I</p>	<p>Insurance Promotion</p>	<p>R20SDC102B</p>	<p>2022- 23</p>	<ul style="list-style-type: none"> <li>○ Understand the field level structure and functioning of insurance sector and it's role in protecting the risks</li> <li>○ Comprehend pertaining skills and their application for promoting insurance coverage</li> <li>○ Plan 'promoting insurance coverage practice' as one of the career options.</li> <li>○ To know about various types of insurance available.</li> <li>○ Prepare better for the Insurance Agent</li> </ul>

					examination conducted by IRDA.
B.Com. General	I	Business Environment	R20COMG103A	2022-23	<ul style="list-style-type: none"> <li>○ Identify and evaluate the complexities of business environment and their impact on the business.</li> <li>○ Analyze the relationships between Government and business and understand the political, economic, legal and social policies of the country.</li> <li>○ Analyze current economic conditions in developing emerging markets, and evaluate present and future opportunities.</li> <li>○ Gain knowledge about the operation of different institutions in international business environment.</li> <li>○ To have a critical study of liberalization, privatization and globalization.</li> </ul>
B.Com. TP	I	Income Tax-I	R20COMT103A	2022-23	<ul style="list-style-type: none"> <li>○ To identify the technical terms related to Income Tax.</li> <li>○ To determine the residential status of an individual and scope of total income.</li> <li>○ To enable the students to compute income under various heads namely income from salaries, house property</li> <li>○ To enable the students to discuss the various exemptions under section 10 the Income tax act, 1961.</li> <li>○ To comprehend the basic knowledge of the</li> </ul>

					laws governing to Income Tax.
B.Com. Logistics	I	Economies of Transport	R20COML103A	2022-23	<ul style="list-style-type: none"> <li>○ Understanding the issues &amp; challenges in the Transportation Sector</li> <li>○ To develop skills required for Transport planning &amp; formulation</li> <li>○ To learn the basic information about the integration of transportation types.</li> <li>○ To understand the legal regulations related to land, air, sea and railway.</li> <li>○ To know about the basic concepts of transportation and the importance of transportation</li> </ul>
BBA	I	Principles of Management	R20BBA101A	2022-23	<ul style="list-style-type: none"> <li>○ Recognize opportunities and challenges associated with strategy-making</li> <li>○ Identify how environments, strategy, structure, culture, tasks, people, and outputs, inform managerial decisions</li> <li>○ Understand and analyze how managers can formulate and implement strategies effectively</li> <li>○ Understand how the managerial tasks of planning, organizing, and controlling can be executed in a variety of circumstances.</li> <li>○ To learn how good managers make organizations successful by building competitive advantages in the forms of cost competitiveness, quality, speed and innovation.</li> </ul>

BBA	I	Managerial Economics	R20BBA102A	2022-23	<ul style="list-style-type: none"> <li>○ Apply the knowledge of the mechanics of supply and demand to explain working of markets</li> <li>○ Describe how changes in demand and supply affect markets</li> <li>○ Understand the choices made by a rational consumer</li> <li>○ Explain relationships between production and costs</li> <li>○ Define key characteristics and consequences of different forms of markets</li> </ul>
BBA	I	Quantitative Methods for Managers	R20BBA103A	2022-23	<ul style="list-style-type: none"> <li>○ Engage in independent and reflective learning. Analyse problems, apply critical thinking, and draw conclusions based on business data.</li> <li>○ Be familiar with relevant mathematical and statistical terminology.</li> <li>○ Understand various quantitative &amp; statistical methods</li> <li>○ Understand data and draw inference from data</li> <li>○ Identify ethical issues in business practice and statistical reporting.</li> </ul>
B.Com. General TP Computers Logistics BBA BCA	II	Agriculture Marketing	R20SDC201B	2022-23	<ul style="list-style-type: none"> <li>○ Understand and appreciate the structure and working of the agricultural marketing system in India.</li> <li>○ Learn how the agriculture marketing system affects the farmers, consumers, and intermediaries.</li> </ul>

					<ul style="list-style-type: none"> <li>○ Develop strategies through which the dynamic marketing system will respond to create a win-win situation</li> <li>○ Appreciate the possible changes in the agriculture input, output, and food market</li> <li>○ Impart knowledge of the marketing efficiency and agricultural prices.</li> </ul>
B.Com. General TP Computers Logistics BBA BCA	II	Advertising	R20SDC203B	2022-23	<ul style="list-style-type: none"> <li>○ To examine the economic and social aspects of advertising</li> <li>○ To explain the concept of IMC</li> <li>○ To evaluate brand building in advertising, special purpose advertising and trends in advertising</li> <li>○ To identify aspects related to advertising agency and careers in advertising</li> <li>○ To examine the fundamentals of creativity in advertising and the concept of creativity through endorsements</li> </ul>
B.Com. General TP Computers Logistics	II	Financial Accounting	R20COM201	2022-23	<ul style="list-style-type: none"> <li>○ Exemplify to prepare and analyse the consignment accounts.</li> <li>○ Acquire the basic concept of accounting terms.</li> <li>○ Journalize the ability to rectify the errors in bank reconciliation statement.</li> <li>○ Exposed to various methods of depreciation</li> <li>○ Demonstrate insight into single and double</li> </ul>

					entry system of accounting.
B.Com. General TP Computers Logistics	II	Business Economics	R20COM202	2022- 23	<ul style="list-style-type: none"> <li>○ Paraphrase the importance of business economics and its terms.</li> <li>○ Articulate the basic knowledge of the demand functions</li> <li>○ Diagnose the factors of consumer behavior</li> <li>○ Enumerate and identify the types of market and product pricing.</li> <li>○ Identify and develop the in depth knowledge of business economics.</li> </ul>
B.Com. General	II	Banking Theory and Practice	R20COMG203	2022- 23	<ul style="list-style-type: none"> <li>○ Get familiarize with the basic concepts and practice of banking and the principles</li> <li>○ To understand about recent trends and innovations in the banking sector.</li> <li>○ To elucidate the bank lending policies and procedures</li> <li>○ To know about electronic banking</li> <li>○ To understand functions of different types of bank</li> </ul>
B.Com. TP	II	Income Tax - II	R20COMT203	2022- 23	<ul style="list-style-type: none"> <li>○ Ascertain the provisions of capital gains.</li> <li>○ Articulate the basic concept related to income from other sources.</li> <li>○ Familiars with the concept of clubbing of income.</li> </ul>

					<ul style="list-style-type: none"> <li>○ Determine the concept related to deduction of gross income.</li> <li>○ Integrate the concept of income tax authorizes.</li> </ul>
B.Com. Logistics	II	Marketing and Sales Management	R20COML203	2022-23	<ul style="list-style-type: none"> <li>○ Articulate the fundamental concepts and functions of marketing.</li> <li>○ Extrapolate the knowledge on market segmentation and consumer behavior.</li> <li>○ Optimize the basic concept of market mix and product policy.</li> <li>○ Expose the knowledge towards channel of distribution in the market.</li> <li>○ Interpret the role and importance of modern trend in marketing.</li> </ul>
BBA	II	Accounting for Managers	R20BBA201	2022-23	<ul style="list-style-type: none"> <li>○ Understanding the nature and purpose of financial statement</li> <li>○ Journalize the ability to rectify the errors in bank reconciliation statement.</li> <li>○ Develop the ability to use accounting concepts and principles</li> <li>○ Applying the use of the fundamental accounting equation to analyze the effect of business transactions in an organization</li> <li>○ To provide knowledge about procedure of</li> </ul>

					issue of shares

II MBA	III	Corporate Entrepreneurship	R20MBA404 ENT	2021-2022	<ul style="list-style-type: none"> <li>▪ Develop a basic knowledge of what is corporate entrepreneurship and how entrepreneurship within a corporation is similar to or different from start-up entrepreneurship.</li> <li>▪ Be able to assess the degree to which the environment within an established company supports or constrains entrepreneurship .</li> <li>▪ Develop an appreciation for how to apply the entrepreneurial process to the operations of a department or a functional</li> </ul>

					<p>area within a large established organization.</p> <ul style="list-style-type: none"> <li>▪ Be able to find creative ways to overcome barriers to entrepreneurship in established companies</li> <li>▪ Gain an appreciation for how to formulate corporate objectives and strategies that support entrepreneurial behaviour.</li> </ul>
II MBA	III	Social Entrepreneurship	R20MBA405 ENT	2021-2022	<ul style="list-style-type: none"> <li>▪ Know about, critique and appreciate the global context in which Social Entrepreneurship continues to emerge as a vital part of the development agenda, especially in the developing countries;</li> <li>▪ Diligently observe, understand, model/represent, communicate about, and constructively engage with Social Entrepreneurs and their Enterprises for making valuable contributions to the respective ecosystems in their work contexts;</li> <li>▪ Identify markets and target groups related to various Social Enterprises, and characterize their ecosystem in terms of Sectors, Stakeholders, Policy-makers and Regulators, Benefactors/Donors, Venture Capitalists, Institutions, Media, etc.;</li> <li>▪ Conceive of, design, plan, establish and operate or work for Social Enterprises in</li> </ul>

					<p>their respective national/regional contexts; and</p> <ul style="list-style-type: none"> <li>▪ Manage the applicable lifecycle of the Social Enterprises with respect to product/service development and the related organizational functions, viz., marketing, resource mobilization in the human resources, financial, material and technological contexts, and operations and projects.</li> </ul>
II MBA	III	Global Entrepreneurial Ecosystem	R20MBA406 ENT	2021-2022	<ul style="list-style-type: none"> <li>▪ Appreciate the importance of global entrepreneurship in 21st century</li> <li>▪ Describe opportunities available to small business in a global environment</li> <li>▪ Identify the important strategic issues in global entrepreneurship</li> <li>▪ Understand the advantages and disadvantages of different modes of entering international markets</li> <li>▪ Understand the importance of cross-cultural customs, communication, and institutions in affecting the implementation of global entrepreneurial ventures.</li> </ul>

DEPARTMENT OF MCA

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
MCA	I	Programming and Problem Solving Using Python	R22MCA101	2022-23	<ul style="list-style-type: none"><li>▪ Understand computer architecture and data representations (variables, representation of numbers and character strings).</li><li>▪ Learn basic algorithmic problem, solving techniques (decision structures, loops, functions).</li><li>▪ Use and understand objects used in programming.</li><li>▪ Design, document, implement and test solutions to programming problems.</li><li>▪ Identify and repair coding errors in a program.</li></ul>
MCA	I	Data Structures	R22MCA102	2022-23	<ul style="list-style-type: none"><li>▪ Ability to select the data structures that efficiently model the information in a problem.</li><li>▪ Ability to assess efficiency trade offs among different data structure implementations or combinations.</li><li>▪ Implement and know the application of algorithms for sorting and pattern matching.</li><li>▪ Design programs using a variety of data structures, including hash tables</li><li>▪ Binary and general tree structures, search</li></ul>

					trees, , graphs, and AVL trees
MCA	I	Mathematical and Statistical Foundations	R22MCA103	2022-23	<ul style="list-style-type: none"> <li>▪ Apply the basic rules and theorems of probability theory such as Baye’s Theorem</li> <li>▪ Determine probabilities that help to solve engineering problems and to determine the expectation and variance of a random variable from its distribution.</li> <li>▪ Able to perform and analyze of sampling, means, proportions, variances and estimates the maximum likelihood based on population parameters.</li> <li>▪ Learn how to formulate and test hypotheses about sample means, variances and proportions andto draw conclusions based on the results of statistical tests.</li> <li>▪ Design various ciphers using number theory</li> </ul>
MCA	I	Operating Systems	R22MCA104	2022-23	<ul style="list-style-type: none"> <li>▪ Understand fundamental operating system abstractions such as processes, threads, files, semaphores,</li> <li>▪ IPC abstractions, shared memory regions, etc.,</li> <li>▪ Analyze important algorithms eg. Process scheduling and memory management algorithms.</li> <li>▪ Categorize the operating system’s resource management techniques, dead lock management techniques,</li> </ul>

					<ul style="list-style-type: none"> <li>▪ memory management techniques</li> </ul>
MCA	I	Personality Development through Life Enlightenment Skills	R22MCA105	2022-23	<p>At the end of this course the students should be able to:</p> <ul style="list-style-type: none"> <li>▪ Develop their personality and achieve their highest goals of life.</li> <li>▪ Lead the nation and mankind to peace and prosperity</li> <li>▪ Practice emotional self-regulation.</li> <li>▪ Develop a positive approach to work and duties</li> <li>▪ Develop a versatile personality</li> </ul>
MCA	II	Software Engineering and Design Patterns	R22MCA201	2022-23	<ul style="list-style-type: none"> <li>▪ Gain knowledge on the concepts of Software Engineering requirements, analysis and design.</li> <li>▪ Understand different life cycle models.</li> <li>▪ Known the concept of object oriented paradigm .</li> <li>▪ Understand the working of software Architecture</li> <li>▪ Understand their design patterns</li> </ul>
MCA	II	Database Management Systems	R22MCA202	2022-23	<ul style="list-style-type: none"> <li>▪ Learn the concepts of databases and database users.</li> <li>▪ Learn the basics of normalization.</li> <li>▪ Learn entity relationship models.</li> <li>▪ To understand the relational algebra and relational calculus.</li> <li>▪ To know Querying, Creating, Updating &amp;</li> </ul>

					Deleting documents in SQL
MCA	II	Computer Networks	R22MCA203	2022-23	<ul style="list-style-type: none"> <li>▪ Understand and describe the layered protocol model.</li> <li>▪ Describe, analyse and evaluate a number of data link, network, and transport layer protocols.</li> <li>▪ Program network communication services for client/server and other application layouts.</li> <li>▪ Describe, analyse and evaluate various related technical, administrative and social aspects of specific computer network protocols from standards documents and other primary materials found through research.</li> <li>▪ Design, analyse, and evaluate networks and services for homes, data centres, IoT/loE, LANs and WANs</li> </ul>
MCA	II	Research Methodology & Intellectual Property Rights (IPR)	R22MCA204	2022-23	<ul style="list-style-type: none"> <li>▪ Understand some basic concepts of research and its methodologies</li> <li>▪ Identify appropriate research topics</li> <li>▪ Select and define appropriate research problem and parameters</li> <li>▪ Demonstrate the ability to choose methods appropriate to research aims and objectives</li> <li>▪ Have adequate knowledge on measurement &amp; scaling techniques</li> <li>▪ Have basic awareness of data analysis-and</li> </ul>

					<p>hypothesis testing procedure</p> <ul style="list-style-type: none"> <li>▪ Prepare a project proposal (to undertake a project)</li> <li>▪ Write a research report and thesis</li> <li>▪ File Patents, Trademarks and Copy Rights</li> </ul>
MCA	II	Design and Analysis of Algorithms	R22MCA205E1	2022-23	<ul style="list-style-type: none"> <li>▪ Understand the basic notation for analyzing the performance of the algorithms.</li> <li>▪ Use divide-and-conquer techniques for solving suitable problems</li> <li>▪ Use greedy approach to solve an appropriate problem for optimal solution.</li> <li>▪ Apply dynamic programming approach to solve suitable problems</li> <li>▪ Understand the limitations of algorithm power and study how to cope with the limitations of algorithm power</li> </ul>
MCA	II	Data Warehousing and Data Mining	R22MCA205E2	2022-23	<ul style="list-style-type: none"> <li>▪ Understand the basics of types of data, quality of data, suitable techniques required for preprocessing and measures required to perform data analysis</li> <li>▪ Describe the need of classification, identify suitable technique(s) to perform classification, model building and evaluation</li> <li>▪ Identify the requirements and usage of association rule mining on categorical and continuous data.</li> <li>▪ Compare and Identify suitable clustering</li> </ul>

					<p>algorithm(s) (apply with open source tools), interpret, evaluate and report the result</p> <ul style="list-style-type: none"> <li>Describe the requirements and the need of web mining</li> </ul>
MCA	II	Cloud Computing	R22MCA205E3	2022-23	<ul style="list-style-type: none"> <li>core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics.</li> <li>advantages and challenges brought about by the various models and services in cloud computing.</li> <li>Apply the fundamental concepts in data centers to understand the trade offs in power, Efficiency and cost.</li> <li>Identify resource management fundamentals, i.e. resource abstraction, sharing and Sandboxing and outline their role in managing infrastructure in cloud computing.</li> <li>Analyze various cloud programming models and apply them to solve problems on the cloud</li> </ul>
MCA	III	BIG DATA ANALYTICS	R20MCA301	2020-21	<ul style="list-style-type: none"> <li>Ability to identify the characteristics of datasets and compare the trivial data and bigdata for various applications.</li> <li>Ability to select and implement machine learning techniques and computing environment that are suitable for the applications under consideration.</li> </ul>

					<ul style="list-style-type: none"> <li>▪ Ability to solve problems associated with batch learning and online learning,</li> <li>▪ Big data characteristics such as high dimensionality, dynamically growing data and in particular scalability issues</li> <li>▪ Ability to understand and apply scaling up machine learning techniques and associated computing techniques and technologies.</li> </ul>
MCA	III	MOBILE COMPUTING	R20MCA302	2020-21	<ul style="list-style-type: none"> <li>▪ Students will be able to analyse modelling and simulation of various communication networks.</li> <li>▪ Students will be able to generate test and estimate parameters.</li> <li>▪ Students will apply this knowledge for detection estimation</li> <li>▪ Simulation of various communication networks.</li> <li>▪ Gain the knowledge about various types of Wireless Data Networks and wireless Voice Networks</li> </ul>
MCA	III	ARTIFICIAL INTELLIGENCE	R20MCA303	2020-21	<ul style="list-style-type: none"> <li>▪ Find appropriate idealizations for converting real world problems into AI search problems formulated using the appropriate search algorithm.</li> <li>▪ Implement A* and iterative deepening search.</li> <li>▪ Derive Heuristic functions for A* search that</li> </ul>

					<p>are appropriate for a given problem.</p> <ul style="list-style-type: none"> <li>▪ It is expected that the learners select and apply a variety of graph search algorithms underpinning AI applications.</li> <li>▪ It is expected that the students to apply techniques to design expert systems.</li> </ul>
MCA	III	CLOUD COMPUTING	R20MCA304a	2020-21	<ul style="list-style-type: none"> <li>▪ Articulate the main concepts, key technologies, strengths, and limitations of cloud computing and</li> <li>▪ Possible applications for state-of-the-art cloud computing</li> <li>▪ Identify the architecture and infrastructure of cloud computing, including SaaS, PaaS, IaaS, public cloud, private cloud, hybrid cloud, etc.</li> <li>▪ Explain the core issues of cloud computing such as security, privacy, and interoperability.</li> <li>▪ Choose the appropriate technologies, algorithms, and approaches for the related issues.</li> </ul>
MCA	III	INTERNET OF THINGS	R20MCA304b	2020-21	<ul style="list-style-type: none"> <li>▪ Evaluate the appropriate protocol for communication between IoT</li> <li>▪ Analyse the communication protocols for IoT</li> <li>▪ Able to understand the application areas of IOT</li> <li>▪ Able to realize the revolution of Internet in</li> </ul>

					<p>Mobile Devices</p> <ul style="list-style-type: none"> <li>▪ Able to realize the revolution of Internet in Cloud &amp; Sensor Networks</li> </ul>
MCA	III	MACHINE LEARNING	R20MCA304c	2020-21	<ul style="list-style-type: none"> <li>▪ Have a good understanding of the fundamental issues and challenges of machine learning: data, model Selection, model complexity, etc.</li> <li>▪ Have an understanding of the strengths and weaknesses of many popular machine learning approaches.</li> <li>▪ Appreciate the underlying mathematical relationships within and across Machine Learning algorithms</li> <li>▪ Paradigms of supervised and un-supervised learning.</li> <li>▪ Be able to design and implement various machine learning algorithms in a range of real-world applications</li> </ul>
MCA	III	DISTRIBUTED COMPUTING	R20MCA304d	2020-21	<ul style="list-style-type: none"> <li>▪ Able to provide hardware and software issues in modern distributed systems.</li> <li>▪ Get knowledge in distributed architecture, naming, synchronization, consistency and replication, fault tolerance, security, and distributed file systems.</li> <li>▪ Analyse the current popular distributed systems such as peer-to-peer (P2P) systems will also be analyzed.</li> <li>▪ Know about Shared Memory Techniques.</li> </ul>

					<ul style="list-style-type: none"> <li>▪ Able to research and commercial distributed systems.</li> </ul>
MCA	III	SOFTWARE TESTING AND FAULT ANALYSIS	R20MCA305a	2020-21	<ul style="list-style-type: none"> <li>▪ List a range of different software testing techniques and strategies</li> <li>▪ Able to apply specific(automated) unit testing method to the projects.</li> <li>▪ Distinguish characteristics of structural testing methods.</li> <li>▪ Demonstrate the integration testing which aims to uncover interaction</li> <li>▪ Compatibility problems as early as possible</li> </ul> <p>1.</p>
MCA	III	DNA COMPUTING	R20MCA305b	2020-21	<ul style="list-style-type: none"> <li>▪ Able to provide hardware and software issues in modern distributed systems.</li> <li>▪ Get knowledge in DNA,RNA, naming, synchronization, consistency and replication, fault tolerance, security, and distributed file systems.</li> <li>▪ Analyse the current popular distributed systems such as peer-to-peer (P2P) systems will also be analyzed.</li> <li>▪ Know about Shared Cryptography Techniques.</li> <li>▪ Able to research and commercial distributed systems.</li> </ul> <p>2.</p>
MCA	III	SOFTWARE PROJECT	R20MCA305c	2020-21	<ul style="list-style-type: none"> <li>▪ Identify the different project contexts and suggest an appropriate management</li> </ul>

		MANAGEMENT			<p>strategy.</p> <ul style="list-style-type: none"> <li>▪ Practice the role of professional ethics in successful software development.</li> <li>▪ Identify and describe the key phases of project management.</li> <li>▪ Determine an appropriate project management approach through an evaluation of the business context</li> <li>▪ Determine scope of the project.</li> </ul> <p>3.</p>
MCA	IV	Java Full Stack Development	R20MCA405	2022-23	<ul style="list-style-type: none"> <li>▪ The Student will be able to design Web Application using Data base</li> <li>▪ The Student will be able to understand the installation of MongoDB</li> <li>▪ Able to understand the connection using Python</li> <li>▪ Able to create web applications</li> <li>▪ Able to set the connections</li> </ul>
MCA	IV	DATA SCIENCE USING PYTHON	R20MCA403	2020-21	<ul style="list-style-type: none"> <li>▪ The Student will understand the objects</li> <li>▪ Understand Data Interpretation using Numpy</li> <li>▪ The Student will understand the objects and Data Interpretation using Pandas</li> <li>▪ The Student will understand Graphs using Matplotlib</li> <li>▪ The Student will understand the Machine learning models using sklearn</li> </ul>
MCA	IV	CRYPTOGRAPH	R20MCA406	2022-	<ul style="list-style-type: none"> <li>▪ The student will be able to Understand</li> </ul>

		Y& NETWORK SECURITY		23	<p>Message Authentication</p> <ul style="list-style-type: none"><li>▪ To make the students understand the basics of Pretty good Privacy</li><li>▪ To make the students understand the Integration of Digital Signature</li><li>▪ To make the students understand the Kerberos</li><li>▪ To make the students understand the concepts of privacy</li></ul>

DEPARTMENT OF PG CHEMISTRY

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I M.Sc (OCH/ACH)	I	General Chemistry	R22OCH/ACH101	2022-23	<ol style="list-style-type: none"><li>1. Could able to process the analytical Data and could learn how to minimise errors in chemical experiments.</li><li>2.Acquire skill on different titrations for quantitative determinations and on choice of indicators in titrations.</li><li>3.Could aware on the Batch extraction, continuous extraction and counter current extraction and their applications.</li><li>4. Understand the process of natural product isolation.</li><li>5. Understand the concept of chromatography and develops the separation techniques for a mixture of organic molecules and drug materials through chromatographic technique.</li></ol>
I M.Sc (OCH/ACH)	I	Organic Chemistry	R22OCH/ACH102	2022-23	<ol style="list-style-type: none"><li>1. Apply the concepts of bonding, resonance, aromaticity, hyperconjugation and tautomerism to higher organic compounds.</li><li>2. Predict the products, identify reaction intermediates and propose suitable mechanism for organic reactions.</li><li>3. Identify stereogenic centres, recognize enantiomers, diastereomers, meso compounds, draw stereochemical structures, and provide R/S designations of stereocenters.</li><li>4. Apply the concepts of substitution, addition and elimination reactions to some synthetic organic reactions.</li></ol>

					5. Design reactions with the help of name reactions and rearrangements and use of suitable reagents.
I M.Sc (OCH/ACH) H)	I	Inorganic Chemistry-1	R22OCH/ACH1 03	2022- 23	<ol style="list-style-type: none"> <li>1. Understand the d-orbital splitting pattern in different geometries like octahedral, tetrahedral.</li> <li>2. Calculate magnetic moment &amp; crystal field stabilization energy of metal complexes.</li> <li>3. Explain high spin and low spin complexes &amp; formation of metal complexes in solution.</li> <li>4. Understand HSAB rule, chelation, macro cyclic, cryptate effect.</li> <li>5. Determine stability constant of particular complex through pH metry , polagraphic methods etc •</li> </ol>
I M.Sc (OCH/ACH) H)	I	Physical Chemistry-1	R22OCH/ACH1 04	2022- 23	<ol style="list-style-type: none"> <li>1. The basic principles of quantum mechanics. Introduction to new operators such as Hermitian and Hamiltonian and their use in the solution of Hydrogen and Hydrogen like atoms.</li> <li>2. Account for the physical interpretation of distribution functions and discuss and show how these can be used in calculations of basic thermodynamic properties.</li> <li>3. Define and explain surface and interfacial phenomenon.</li> <li>4. Correlate electrochemistry with thermodynamics that will enable to get best output from industrial perspective.</li> <li>5. Understand the concept of activation energy and its calculation from kinetic data.</li> </ol>
I M.Sc	I	Personality	R22OCH/ACH1	2022-	1. Develop their personality and achieve their highest goals of life.

(OCH/ACH)		Development through life Enlightenment Skills	05	23	<ol style="list-style-type: none"> <li>2. Lead the nation and mankind to peace and prosperity</li> <li>3. Practice emotional self regulation.</li> <li>4. Develop a positive approach to work and duties</li> <li>5. Develop a versatile personality.</li> </ol>
I M.Sc (OCH/ACH)	II	ORGANIC SPECTROSCOPY	R22OCH/ACH201	2022-23	<ol style="list-style-type: none"> <li>1. Understand basic concepts of organic spectroscopy.</li> <li>2. Calculate the <math>\lambda_{max}</math> value of organic molecules by Woodward rules.</li> <li>3. Learn the fundamentals of instrumentation of UV, IR, NMR and mass.</li> <li>4. Analysis of organic molecules by different spectroscopic techniques.</li> <li>5. Do fragmentation pattern (analysis) of organic molecules by using mass spectrometry.</li> </ol>
I M.Sc (OCH/ACH)	II	Physical Chemistry-II	R22OCH/ACH202	2022-23	<ol style="list-style-type: none"> <li>1. Recognize symmetry elements, identify point groups of molecules, construct and explain character table for simple molecules.</li> <li>2. Categorize molecules based on their symmetry properties and predict their molecular properties.</li> <li>3. Combine, evaluate and interpret information from the various spectroscopic techniques in determination of molecular structures.</li> <li>4. Account for the physical interpretation of partition functions and be able to calculate thermodynamic properties of model systems with using Boltzmann -, Fermi-Dirac and Bose-Einstein statistics.</li> <li>5. Account for the physical interpretation of distribution functions and discuss and show how these can be used in calculations of basic thermodynamic properties.</li> <li>6. Explain fundamental aspects of electrochemical reaction in terms of thermodynamics, and kinetics.</li> </ol>
I M.Sc (OCH/ACH)	II	Inorganic Chemistry-II	R22OCH/ACH203	2022-23	<ol style="list-style-type: none"> <li>1. Understand the classification of clusters and different structural patterns of metal clusters.</li> <li>2. Discuss how ligand substitution reaction takes place in octahedral and square-planar, trans effect and trans influence and how trans effect is</li> </ol>

					<p>applicable in synthesis of different metal complexes.</p> <p>3. Interpret the magnetic properties of transition metal complexes based on magnetic measurements.</p> <p>4. Discuss terms, state &amp; microstate &amp; Orgel diagram and calculate microstate &amp; terms of different configurations.</p> <p>5. Explain how metal ions take part in biological system and their concentration effect and physiological effect on biological system.</p>
I M.Sc (OCH/ACH)	II	Research Methodology	R22OCH/ACH2 04	2022- 23	<p>1. Understand the formulation of Research problems.</p> <p>2. Collect and prepare suitable data for research.</p> <p>3. Design experiments for different statistical Concepts.</p> <p>4. Write research proposals and reports.</p> <p>5. Apply their research work for patent through IPR.</p>
I M.Sc (OCH/ACH)	II	Chemistry of Bioorganic compounds	R22OCH/ACH2 06	2022- 23	<p>1. Understand the stereochemistry of carbohydrates and their reactions.</p> <p>2. Learn the molecular structures of 20 amino acids, differentiating essential and non-essential amino acids, biologically important modified amino acids and their functions.</p> <p>3. Understand the difference between the water soluble and fat soluble vitamins and their key role in the metabolism as coenzymes.</p> <p>4. Relate the structure of DNA with its function in Replication and gene expression that include both transcription and translation.</p> <p>5. Describe what happens: - when lipids are metabolized, cholesterol, prostaglandins etc. are synthesized, emphasizing the genetic defects of lipid metabolism.</p>
II M.Sc (ACH)	III	Separation methods	R20ACH301	2020- 21	<p>1. Classify separation methods based on the underlying principles, such as differences in physical properties or chemical interactions.</p> <p>2. Explore the principles of adsorption and partitioning as separation mechanisms.</p>

					<ol style="list-style-type: none"> <li>3. Study chromatographic techniques, including gas chromatography (GC), liquid chromatography (LC), and thin-layer chromatography (TLC).</li> <li>4. Learn the principles and applications of column chromatography for the separation of compounds.</li> <li>5. Explore the use of HPLC for the separation and quantification of analytes in complex mixtures.</li> <li>6. Study gel electrophoresis and capillary electrophoresis as techniques for separating biomolecules based on charge and size.</li> <li>7. Become familiar with the instrumentation used in separation methods, including detectors and data acquisition systems.</li> </ol>
II M.Sc (ACH)	III	Spectroscopic Methods	R20ACH302	2020-21	<ol style="list-style-type: none"> <li>1. Advanced knowledge about the interactions of electromagnetic radiation and matter and their applications in organic spectroscopy to elucidate the structure of the organic compounds.</li> <li>2. Learn the factors affecting <math>^{13}\text{C}</math> NMR chemical shifts</li> <li>3. Identify functional groups using IR, <math>\lambda_{\text{max}}</math> for polyenes and <math>\alpha</math>, <math>\beta</math>-unsaturated carbonyl compounds.</li> <li>4. Interpret Cotton effect curves for obtaining absolute configuration of chiral molecules with chromophores.</li> <li>5. Determine chemical structure by UV-Vis, IR, <math>^1\text{H}</math>NMR, <math>^{13}\text{C}</math>NMR and mass spectral data.</li> </ol>
II M.Sc (ACH)	III	Applied Analysis	R20ACH303	2020-21	<ol style="list-style-type: none"> <li>1. Understand chemical analysis methods, such as titration, gravimetric analysis, and spectrophotometry, used to quantify metal content in Fe, Mn and Al ores.</li> <li>2. Learn methods for quantifying nutrient content in fertilizers, including nitrogen, phosphorus, and potassium analysis.</li> <li>3. Understand calorimetry and combustion analysis methods to</li> </ol>

					<p>determine the energy content and composition of fuels.</p> <ol style="list-style-type: none"> <li>Learn methods for analyzing the chemical composition of cement, including the determination of major and minor components..</li> <li>Study analytical methods to determine the composition of paints, including pigments, binders, solvents, and additives.</li> <li>Integrate knowledge from various areas of chemistry and materials science to perform accurate and reliable analyses.</li> </ol>
II M.Sc (ACH)	III	Instrumental methods of Analysis	R20ACH304	2020-21	<ol style="list-style-type: none"> <li>Understand the principles and applications of amperometry for monitoring current at a constant applied potential.</li> <li>Explore techniques such as cyclic voltammetry, square wave voltammetry, and differential pulse voltammetry for qualitative and quantitative analysis.</li> <li>Understand the basic principles of coulometric analysis, including Faraday's laws of electrolysis and Perform coulometric titrations and calculate analyte concentrations using Faraday's laws.</li> <li>Identify the types of analytes suitable for polarographic analysis and their electrochemical behaviour and learn various polarographic techniques, such as direct current (DC), differential pulse (DP), and square wave (SW) polarography.</li> <li>Explore the application of thermal analysis in characterizing polymers, pharmaceuticals, ceramics, and other materials.</li> <li>Learn how to atomize samples in a flame and convert them into free atoms for analysis.</li> <li>Apply flame photometry for the quantitative determination of specific elements, such as sodium, potassium, and calcium.</li> </ol>
II M.Sc (ACH)	IV	Green Chemistry	R20ACH402.2	2020-21	<ol style="list-style-type: none"> <li>Define the principles and concepts of green chemistry, including the 12 principles of green chemistry outlined by Anastas and Warner.</li> </ol>

					<ol style="list-style-type: none"> <li>2. Evaluate the environmental and health impacts of chemical processes and products, and identify ways to reduce or eliminate these impacts.</li> <li>3. Demonstrate knowledge of safer and more sustainable methods for chemical synthesis, including solvent selection, reaction conditions, and waste reduction.</li> <li>4. Compare and contrast the use of alternative solvents and reaction media (e.g., ionic liquids, supercritical fluids) for green chemistry applications.</li> <li>5. Describe the importance of catalysis in green chemistry and identify green catalytic processes.</li> <li>6. Develop strategies for waste minimization and recycling in chemical processes.</li> </ol>
II M.Sc (ACH)	IV	Traditional and Environmental I Methods of Analysis	R20ACH403.1	2020- 21	<ol style="list-style-type: none"> <li>1. Understand the fundamental principles of decomposition techniques in chemical analysis and recognize the importance of decomposition in breaking down complex samples into analytically manageable components.</li> <li>2. Master acid digestion methods for decomposing samples and solubilizing analytes and Study alkaline hydrolysis techniques for breaking down complex organic molecules.</li> <li>3. Understand the fundamental principles of organic functional group analysis and its importance in organic chemistry and Understand how knowledge of functional groups contributes to the determination of molecular structure and compound identification.</li> <li>4. Understand the fundamental principles of drug analysis and its significance in pharmaceutical science.</li> <li>5. Study chromatographic techniques, including high-performance</li> </ol>

					<p>liquid chromatography (HPLC) and gas chromatography (GC), used for drug analysis.</p> <p>6. Explore techniques for measuring electrical conductivity and pH as indicators of water chemistry and Explore techniques for measuring electrical conductivity and pH as indicators of water chemistry.</p>
II M.Sc (ACH)	IV	Quality Control and Standard Methods of Analysis	R20ACH404	2020-21	<ol style="list-style-type: none"> <li>1. Familiarize yourself with the ISO (International Organization for Standardization) standards relevant to your industry.</li> <li>2. Learn the importance of accurate record keeping and documentation in quality control, including laboratory notebooks, standard operating procedures (SOPs), and batch records.</li> <li>3. Understand the principles of QA and its role in maintaining consistent product quality.</li> <li>4. Study the chemistry behind the formation of precipitates and the conditions that favor their formation. .</li> <li>5. Master techniques for isolating and collecting precipitates from solution. .</li> <li>6. Learn about various filtration methods, including gravity filtration, vacuum filtration, and microfiltration.</li> <li>7. Understand sample digestion techniques for converting analytes into a suitable form for precipitation.</li> </ol>

### M.Sc. Analytical Chemistry:

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I M.Sc (OCH/ACH)	I	General Chemistry	R22OCH/ACH101	2022-23	<ol style="list-style-type: none"><li>1. Could able to process the analytical Data and could learn how to minimise errors in chemical experiments.</li><li>2.Acquire skill on different titrations for quantitative determinations and on choice of indicators in titrations.</li><li>3.Could aware on the Batch extraction, continuous extraction and counter current extraction and their applications.</li><li>4. Understand the process of natural product isolation.</li><li>5. Understand the concept of chromatography and develops the separation techniques for a mixture of organic molecules and drug materials through chromatographic technique.</li></ol>
I M.Sc (OCH/ACH)	I	Organic Chemistry	R22OCH/ACH102	2022-23	<ol style="list-style-type: none"><li>1. Apply the concepts of bonding, resonance, aromaticity, hyperconjugation and tautomerism to higher organic compounds.</li><li>2. Predict the products, identify reaction intermediates and propose suitable mechanism for organic reactions.</li><li>3. Identify stereogenic centres, recognize enantiomers, diastereomers, meso compounds, draw stereochemical structures, and provide R/S designations of stereocenters.</li><li>4. Apply the concepts of substitution, addition and elimination reactions to some synthetic organic reactions.</li></ol>

					5. Design reactions with the help of name reactions and rearrangements and use of suitable reagents.
I M.Sc (OCH/ACH)	I	Inorganic Chemistry-1	R22OCH/ACH103	2022-23	<ol style="list-style-type: none"> <li>1. Understand the d-orbital splitting pattern in different geometries like octahedral, tetrahedral.</li> <li>2. Calculate magnetic moment &amp; crystal field stabilization energy of metal complexes.</li> <li>3. Explain high spin and low spin complexes &amp; formation of metal complexes in solution.</li> <li>4. Understand HSAB rule, chelation, macro cyclic, cryptate effect.</li> <li>5. Determine stability constant of particular complex through pH metry , polagraphic methods etc •</li> </ol>
I M.Sc (OCH/ACH)	I	Physical Chemistry-1	R22OCH/ACH104	2022-23	<ol style="list-style-type: none"> <li>1. The basic principles of quantum mechanics. Introduction to new operators such as Hermitian and Hamiltonian and their use in the solution of Hydrogen and Hydrogen like atoms.</li> <li>2. Account for the physical interpretation of distribution functions and discuss and show how these can be used in calculations of basic thermodynamic properties.</li> <li>3. Define and explain surface and interfacial phenomenon.</li> <li>4. Correlate electrochemistry with thermodynamics that will enable to get best output from industrial perspective.</li> <li>5. Understand the concept of activation energy and its calculation from kinetic data.</li> </ol>
I M.Sc	I	Personality	R22OCH/ACH1	2022-	. Develop their personality and achieve their highest goals of life.

(OCH/ACH)		Development through life Enlightenment Skills	05	23	<ul style="list-style-type: none"> <li>. Lead the nation and mankind to peace and prosperity</li> <li>. Practice emotional self regulation.</li> <li>. Develop a positive approach to work and duties</li> <li>0. Develop a versatile personality.</li> </ul>
I M.Sc (OCH/ACH)	II	ORGANIC SPECTROSCOPY	R22OCH/ACH201	2022-23	<ol style="list-style-type: none"> <li>1. Understand basic concepts of organic spectroscopy.</li> <li>2. Calculate the <math>\lambda_{\max}</math> value of organic molecules by Woodward rules.</li> <li>3. Learn the fundamentals of instrumentation of UV, IR, NMR and mass.</li> <li>4. Analysis of organic molecules by different spectroscopic techniques.</li> <li>5. Do fragmentation pattern (analysis) of organic molecules by using mass spectrometry.</li> </ol>
I M.Sc (OCH/ACH)	II	Physical Chemistry-II	R22OCH/ACH202	2022-23	<ol style="list-style-type: none"> <li>1. Recognize symmetry elements, identify point groups of molecules, construct and explain character table for simple molecules.</li> <li>2. Categorize molecules based on their symmetry properties and predict their molecular properties.</li> <li>3. Combine, evaluate and interpret information from the various spectroscopic techniques in determination of molecular structures.</li> <li>4. Account for the physical interpretation of partition functions and be able to calculate thermodynamic properties of model systems with using Boltzmann -, Fermi-Dirac and Bose-Einstein statistics.</li> <li>5. Account for the physical interpretation of distribution functions and discuss and show how these can be used in calculations of basic thermodynamic properties.</li> <li>6. Explain fundamental aspects of electrochemical reaction in terms of thermodynamics, and kinetics.</li> </ol>
I M.Sc (OCH/ACH)	II	Inorganic Chemistry-II	R22OCH/ACH203	2022-23	<ol style="list-style-type: none"> <li>1. Understand the classification of clusters and different structural patterns of metal clusters.</li> <li>2. Discuss how ligand substitution reaction takes place in octahedral and square- planar, trans effect and trans influence and how trans effect is</li> </ol>

					<p>applicable in synthesis of different metal complexes.</p> <p>3. Interpret the magnetic properties of transition metal complexes based on magnetic measurements.</p> <p>4. Discuss terms, state &amp; microstate &amp; Orgel diagram and calculate microstate &amp; terms of different configurations.</p> <p>5. Explain how metal ions take part in biological system and their concentration effect and physiological effect on biological system.</p>
I M.Sc (OCH/ACH)	II	Research Methodology	R22OCH/ACH204	2022-23	<ol style="list-style-type: none"> <li>1. Understand the formulation of Research problems.</li> <li>2. Collect and prepare suitable data for research.</li> <li>3. Design experiments for different statistical Concepts.</li> <li>4. Write research proposals and reports.</li> <li>5. Apply their research work for patent through IPR.</li> </ol>
I M.Sc (OCH/ACH)	II	Chemistry of Bioorganic compounds	R22OCH/ACH206	2022-23	<ol style="list-style-type: none"> <li>1. Understand the stereochemistry of carbohydrates and their reactions.</li> <li>2. Learn the molecular structures of 20 amino acids, differentiating essential and non-essential amino acids, biologically important modified amino acids and their functions.</li> <li>3. Understand the difference between the water soluble and fat soluble vitamins and their key role in the metabolism as coenzymes.</li> <li>4. Relate the structure of DNA with its function in Replication and gene expression that include both transcription and translation.</li> <li>5. Describe what happens: - when lipids are metabolized, cholesterol, prostaglandins etc. are synthesized, emphasizing the genetic defects of lipid metabolism.</li> </ol>
II M.Sc (ACH)	III	Separation methods	R20ACH301	2020-21	<ol style="list-style-type: none"> <li>1. Classify separation methods based on the underlying principles, such as differences in physical properties or chemical interactions.</li> <li>2. Explore the principles of adsorption and partitioning as separation mechanisms.</li> </ol>

					<p>0. Study chromatographic techniques, including gas chromatography (GC), liquid chromatography (LC), and thin-layer chromatography (TLC).</p> <p>1. Learn the principles and applications of column chromatography for the separation of compounds.</p> <p>2. Explore the use of HPLC for the separation and quantification of analytes in complex mixtures.</p> <p>3. Study gel electrophoresis and capillary electrophoresis as techniques for separating biomolecules based on charge and size.</p> <p>4. Become familiar with the instrumentation used in separation methods, including detectors and data acquisition systems.</p>
II M.Sc (ACH)	III	Spectroscopic Methods	R20ACH302	2020-21	<p>1. Advanced knowledge about the interactions of electromagnetic radiation and matter and their applications in organic spectroscopy to elucidate the structure of the organic compounds.</p> <p>2. Learn the factors affecting <math>^{13}\text{C}</math> NMR chemical shifts</p> <p>3. Identify functional groups using IR, <math>\lambda_{\text{max}}</math> for polyenes and <math>\alpha</math>, <math>\beta</math>-unsaturated carbonyl compounds.</p> <p>4. Interpret Cotton effect curves for obtaining absolute configuration of chiral molecules with chromophores.</p> <p>0. Determine chemical structure by UV-Vis, IR, <math>^1\text{H}</math>NMR, <math>^{13}\text{C}</math>NMR and mass spectral data.</p>
II M.Sc (ACH)	III	Applied Analysis	R20ACH303	2020-21	<p>1. Understand chemical analysis methods, such as titration, gravimetric analysis, and spectrophotometry, used to quantify metal content in Fe, Mn and Al ores.</p> <p>2. Learn methods for quantifying nutrient content in fertilizers, including nitrogen, phosphorus, and potassium analysis.</p> <p>3. Understand calorimetry and combustion analysis methods to determine the energy content and composition of fuels.</p>

					<ul style="list-style-type: none"> <li>0. Learn methods for analyzing the chemical composition of cement, including the determination of major and minor components..</li> <li>1. Study analytical methods to determine the composition of paints, including pigments, binders, solvents, and additives.</li> <li>2. Integrate knowledge from various areas of chemistry and materials science to perform accurate and reliable analyses.</li> </ul>
II M.Sc (ACH)	III	Instrumental methods of Analysis	R20ACH304	2020-21	<ul style="list-style-type: none"> <li>1. Understand the principles and applications of amperometry for monitoring current at a constant applied potential.</li> <li>2. Explore techniques such as cyclic voltammetry, square wave voltammetry, and differential pulse voltammetry for qualitative and quantitative analysis.</li> <li>0. Understand the basic principles of coulometric analysis, including Faraday's laws of electrolysis and Perform coulometric titrations and calculate analyte concentrations using Faraday's laws.</li> <li>1. Identify the types of analytes suitable for polarographic analysis and their electrochemical behaviour and learn various polarographic techniques, such as direct current (DC), differential pulse (DP), and square wave (SW) polarography.</li> <li>2. Explore the application of thermal analysis in characterizing polymers, pharmaceuticals, ceramics, and other materials.</li> <li>3. Learn how to atomize samples in a flame and convert them into free atoms for analysis.</li> <li>4. Apply flame photometry for the quantitative determination of specific elements, such as sodium, potassium, and calcium.</li> </ul>
II M.Sc (ACH)	IV	Green Chemistry	R20ACH402.2	2020-21	<ul style="list-style-type: none"> <li>1. Define the principles and concepts of green chemistry, including the 12 principles of green chemistry outlined by Anastas and Warner.</li> <li>2. Evaluate the environmental and health impacts of chemical processes and products, and identify ways to reduce or eliminate these impacts.</li> </ul>

					<ul style="list-style-type: none"> <li>. Demonstrate knowledge of safer and more sustainable methods for chemical synthesis, including solvent selection, reaction conditions, and waste reduction.</li> <li>0. Compare and contrast the use of alternative solvents and reaction media (e.g., ionic liquids, supercritical fluids) for green chemistry applications.</li> <li>1. Describe the importance of catalysis in green chemistry and identify green catalytic processes.</li> <li>2. Develop strategies for waste minimization and recycling in chemical processes.</li> </ul>
II M.Sc (ACH)	IV	Traditional and Environmental Methods of Analysis	R20ACH403.1	2020-21	<ul style="list-style-type: none"> <li>. Understand the fundamental principles of decomposition techniques in chemical analysis and recognize the importance of decomposition in breaking down complex samples into analytically manageable components.</li> <li>. Master acid digestion methods for decomposing samples and solubilizing analytes and Study alkaline hydrolysis techniques for breaking down complex organic molecules.</li> <li>. Understand the fundamental principles of organic functional group analysis and its importance in organic chemistry and Understand how knowledge of functional groups contributes to the determination of molecular structure and compound identification.</li> <li>0. Understand the fundamental principles of drug analysis and its significance in pharmaceutical science.</li> <li>1. Study chromatographic techniques, including high-performance liquid chromatography (HPLC) and gas chromatography (GC), used for drug analysis.</li> <li>2. Explore techniques for measuring electrical conductivity and pH as indicators of water chemistry and Explore techniques for measuring</li> </ul>

					electrical conductivity and pH as indicators of water chemistry.
II M.Sc (ACH)	IV	Quality Control and Standard Methods of Analysis	R20ACH404	2020-21	<ol style="list-style-type: none"> <li>1. Familiarize yourself with the ISO (International Organization for Standardization) standards relevant to your industry.</li> <li>2. Learn the importance of accurate record keeping and documentation in quality control, including laboratory notebooks, standard operating procedures (SOPs), and batch records.</li> <li>3. Understand the principles of QA and its role in maintaining consistent product quality.</li> <li>4. Study the chemistry behind the formation of precipitates and the conditions that favor their formation. .</li> <li>5. Master techniques for isolating and collecting precipitates from solution. .</li> <li>6. Learn about various filtration methods, including gravity filtration, vacuum filtration, and microfiltration.</li> <li>7. Understand sample digestion techniques for converting analytes into a suitable form for precipitation.</li> </ol>

# DEEKSHARAMBH – 2022

A Student Induction Programme

Organized by: Internal Quality Assurance Cell

Inviting the Guests by  
Dr. G. Krishnaveni, IQAC Coordinator

Dr. V. Narayana Rao, Principal,  
addressing the gathering

Talk by the Chief Guest  
Sri V. Harshavardhan Raju, IPS,  
Deputy Commissioner of Police,  
Vijayawada West

Day-1 (07.02.2022):

Day-2 (08.02.2022):

Student induction programme is organized to orient the newly admitted students about the institute, autonomy, student support services, activities of the departments, student centric teaching learning process, evaluation and assessment system, course objectives and outcomes, course structure and infrastructure facilities available at the institution. The induction programme served as a strong foundation for the first year students for beginning their three year long journey.

The student induction programme was conducted for a period of 3 days which was inaugurated on 7<sup>th</sup> January, 2022 by Sri Harshavardhan Raju, IPS, The schedule of the student induction programme is:

<b>Dates</b>	<b>Forenoon Session</b>	<b>Afternoon Session</b>
<b>07.02.2022</b>	B.Com. (Gen)	B.Sc. (MPC)
	B.Com. (T.P)	B.Sc. (CBZ)
	B.Com. (Log)	B.Sc. (MPCS)
		B.Sc. (MCCS)
<b>08.02.2022</b>	B.Com. (Comp)-1 & 2	B.Sc. (DS)
	BBA	B.Sc. (MECS)
		B.Sc. (IoT)
<b>09.02.2022</b>	BCA-1 & 2	B.Sc. (MSCS)-1 &
		B.Voc. (WT&SD)

During the programme the Principal Dr. V. Narayana Rao summarized the overall achievements and activities of the institution. As the institution has 'Ragging Free Campus' the Vice-Principals educated the rules and regulations regarding the discipline that students have to follow in the campus and told the students about the infrastructure facilities provided in the campus. Sri Ch. Ramesh Babu, Controller of Examinations created awareness among students on examination pattern and evaluation pattern followed in the autonomous. Later all the In-Charges and Convenors of the Student Support services created awareness about the facilities provided and activities and awareness programmes organized in their respective cells and committees.

# DEEKSHARAMBH – 2021

## Introduction:

KBN College Autonomous conducted the Student induction programme from 16<sup>th</sup> to 17<sup>th</sup> April to make students comfortable with the institution rules and regulations. Transition from junior college to Higher education is one of the most challenging event in the student's life. When new students enter an institution, they come with diverse thoughts, backgrounds and preparations. They come into a new unfamiliar environment, and most of them have little knowledge of a college. An important task, therefore, is to welcome new students to Higher Education and prepare them for their new role. Student Induction is designed to help in the whole process.

## Deeksharambh - Student Induction Programme:

The purpose of KBN College Deeksharambh 2021 - Student Induction Programme is to help new students adjust and feel comfortable in the new environment, inculcate in them the ethos and culture of the institution, help them build bonds with other students and faculty members, and expose them to a sense of larger purpose and self-exploration.

The term induction is generally used to describe the whole process whereby the incumbents adjust to or acclimatize to their new roles and environment. In other words, it is a well-planned event to educate the new entrants about the environment in KBN College, and connect them with the people in it.

Student Induction Programme engages with the new students as soon as they come into Our institution, before the commencement of regular classes. At the start of the induction, the incumbents learn about the KBN College policies, processes, practices, culture and values.

Students Induction could cover a number of different aspects (SAGE):

**Socializing:** meeting other new students, senior students, students union, lectures by Eminent People;

**Associating:** visits to University / college, visits to Dept./Branch/ Programme of study and important places in campus, local area, city and so on;

**Governing:** rules and regulations, student support etc;

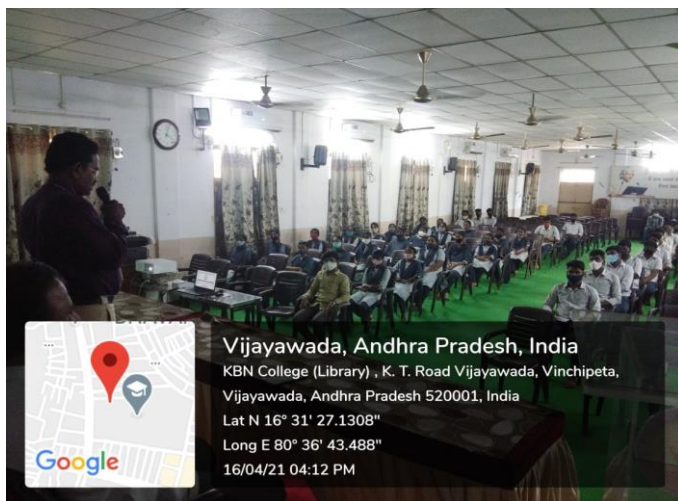

**Experiencing:** Subject lectures, study skills, small-group activities, physical activity, creative and performing arts, literary activities, universal human values, etc.

### Programme Schedule:

## Principal's Message:

Our Beloved Principal Sri E.Vara Prasad Sir Started his speech by remembering the words of Noble Soul of the universe Legendry Nelson Mandela

“Education is the most powerful weapon which you can use to change the world” – Nelson Mandela

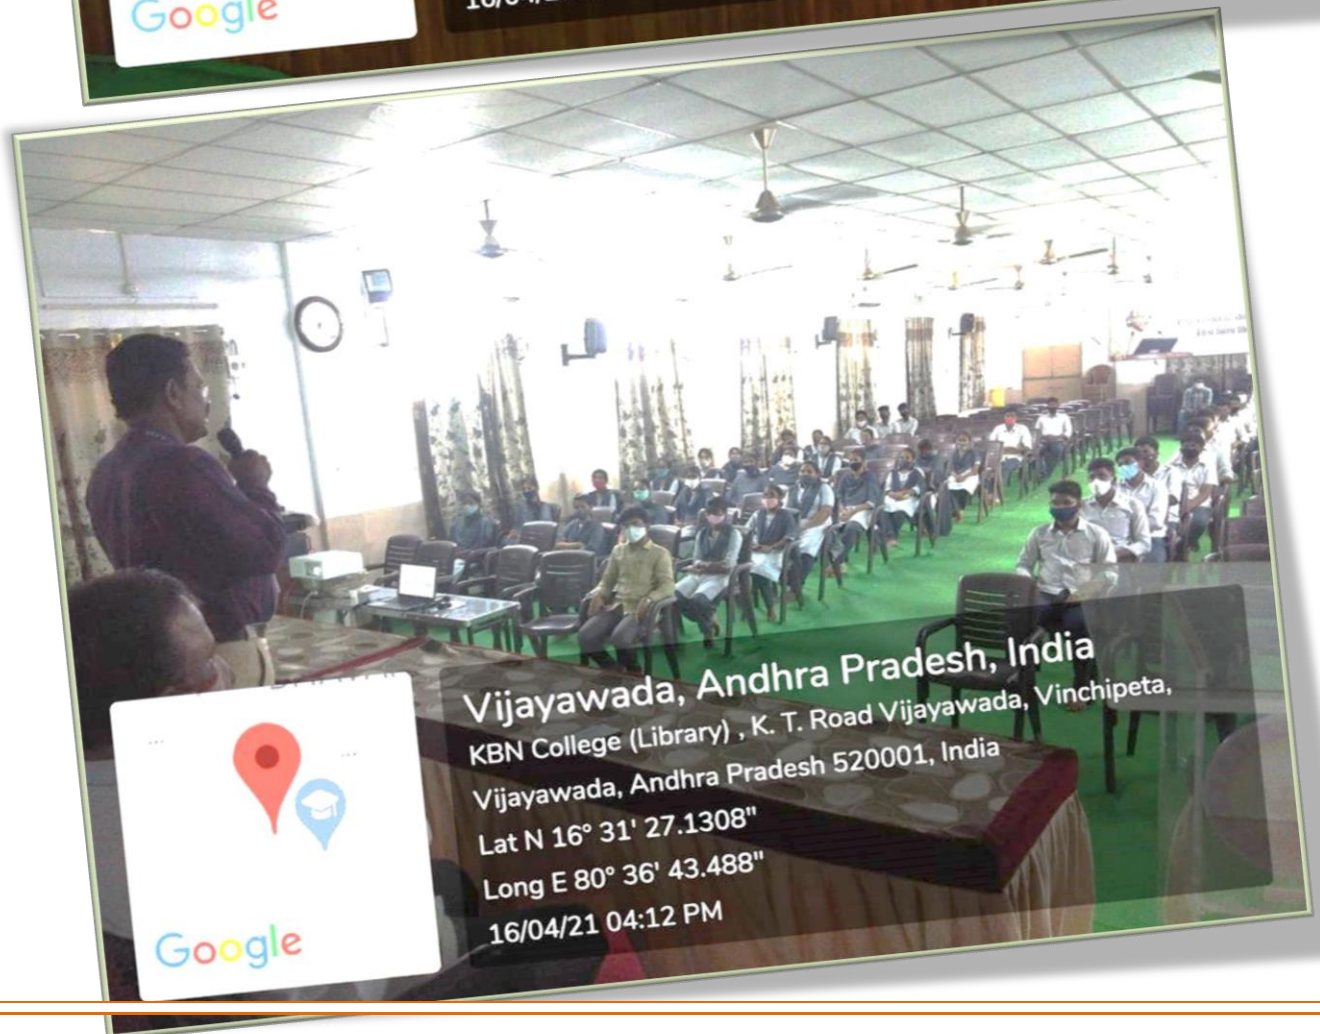

at the foundation of our college and its Achievements then he advised the students to set a goal and work to achieve it. He said, that a person can't achieve his goals without a clear object, without a real passion, without a determined ambition.” be cautious make a clear object about your future, with a real passion and with a determined ambition.

## COE Message:

Sri M VenkateswaraRao, COE Autonomous briefed the rules and regulations of autonomous and explained the best practices in the examinations.

Later Mr. Ch.RameshBabu and Mr. S. Harinadh Babu ACOE's of Autonomous carried out the programme sessions in explaining the entire structure of autonomous, rules, regulations and do's and don'ts in the examinations at KBN College.

## Three – Day Students Induction Meet – 2019-20

3<sup>rd</sup> – 5<sup>th</sup> July, 2019

Organized by: Ward Counselling Committee

### **REPORT**

Students Induction Meet for the Academic Year 2019-20 was held from 3<sup>rd</sup> to 5<sup>th</sup> July, 2019, by the Ward-Counselling Committee. The meeting was organised under the Presidentship of Dr. V. Narayana Rao, Principal for the first year degree students. The purpose of the Meet is to inform the details about student programmes – curriculum & non-curriculum activities run by the college.

The Principal in his address briefed the students about the college facilities. Vice-Principals Sri E. Vara Prasad & Dr. K. Naveen Kumar enlightened the students about the discipline in the campus. Academic Director Sri P. L. Ramesh briefed the students about the academics. Controller of Examinations Sri C. Pitchi Reddy explained about the pattern of examinations and importance of Choice Based Credit System. The Convenor of Ward-Counselling Committee Dr. K. Siva Prakasa Rao gave the details about remedial coaching offered for the slow learners in the college and importance of student attendance. He said that study materials will be distributed to economically backward and reserved category students.

In Mentoring system, selected staff member would be the Mentors. One staff member will be the Mentor for one class, monitoring the academic performance and discipline. Student profile book is maintained by the mentor, which consists of all the information pertaining to the student concerned. Each Mentor will officially interact with the student once in a month. Besides this, the student is encouraged to meet the concerned mentor by fixing an appointment with

him/her for his/her all-round development. The students are also given personal counselling through the college psychiatrist to reduce their stress.

NSS Programme Officer, Sri J. Panduranga Rao gave the details of NSS activities and the importance of NSS to the society. The NCC officer Lt. K. P. T. Vijaya Bhaskar gave the details about the use of NCC. The HoD of Physical Education Sri D. Hemachandra Rao addressed the students about sports calendar and practice sessions for the year 2019-20. The convenor of Dramatic Association Sri V. Seshagiri Rao spoke on the importance of cultural events and advised the students to join in dramatic association to come out with the creative talents. The Convenor of Red Ribbon Club Dr. M. Venkata Srinivasa Rao motivated the students regarding blood donation and how it helps the society. The HOD of Library Science Sri V. Tirupathi Rao has given details about the issuing and borrowing books and utilisation of digital library etc. Finally, the Placement officer Sri B. Srinivasa Reddy addressed the students regarding the companies about campus recruitments and recruitment procedures.

**FACULTY DEVELOPMENT PROGRAMME  
(OUTCOME BASED EDUCATION)**

**FACULTY DEVELOPMENT PROGRAMME ON  
'OUTCOME BASED EDUCATION: LEARNING  
OUTCOMES AS A TOOL TO ASSESS PROGRESSION'**

3<sup>rd</sup> December, 2022

Organized by: **Internal Quality Assurance Cell**

A Faculty Development Programme was organized by Internal Quality Assurance Cell on 'Outcome Based Education: Learning Outcomes as a Tool to Assess Progression' by Dr. A. Xavier Mahimairaj, IQAC Coordinator, Loyola College, Chennai on 3<sup>rd</sup> December, 2022 at 11:00 A.M.

Objectives:

- Outcome based Education helps Higher Education Institutions to analyze, assess and map the lesson learnt by students based on the questions attempted to attain Programme Outcomes (POs), Course Outcomes (Cos) and Programme Education Objectives (PEOd).
- To create awareness among faculty members about Outcome-Based Education System.

The programme was started by inviting the dignitaries by Dr. G. Krishnaveni, IQAC Coordinator, and the programme was inaugurated by opening remarks of the Principal Dr. V. Narayana Rao.

Dr. Xavier explained the selective teaching and learning activities (TLAS), Assessment Planning, Cognitive Level Mapping, Co Attainment of a Course (Indirect Method). He also delivered informative talk about How to write Course Outcomes, Programme Educational Objectives, Programme Specific Outcomes and Programme Outcomes.

Later he explained how to map Course Outcomes with programme specific outcomes, programme specific outcomes with programme outcomes and programme educational objectives with programme outcome. Dr. Xavier, at a conclusion elaborately explained the staff how to calculate the attainment of course outcomes, programme specific outcomes and programme outcomes with examples. He clarified the queries raised by the faculty.

Outcome:

- Faculty can be able to write course outcomes, programme educational objectives, programme specific outcomes and programme outcomes.
- They are able to map among these and calculate the attainment.

Total 92 Staff of UG & PG are attended this FDP. The programme was concluded by the Vote of Thanks delivered by Smt. Shamim, Asst. Coordinator, IQAC.

Reading Room

**ORIENTATION FOR NEWLY RECRUITED  
FACULTY BY IQAC**

## Orientation for newly recruited faculty by IQAC

29<sup>th</sup> December, 2022

**Principal Dr. V. Narayana Rao, addressing the gathering**

**Talk by Dr. S. Sasikala, Former Principal**

## REPORT

The Faculty Development Program for newly recruited faculty members at KBN College was organized with the aim of enhancing their teaching and professional skills on 29<sup>th</sup> December, 2022 by Dr. S. Sasikala, Former Principal, KBN College.

The FDP was initiated to support the professional growth and success of recently hired faculty members. It aimed to provide them with the resources and guidance necessary to adapt to the college's environment and excel in their teaching and research roles.

Dr. Sasikala, advised to adopt the following for their professional growth.

### Objectives:

- To familiarize newly recruited faculty with the college's mission, vision, and academic culture.
- To enhance teaching skills, curriculum development, and classroom management techniques.
- To provide guidance and resources for research activities.
- To establish mentor-mentee relationships with experienced faculty members.
- To encourage interaction and collaboration among new faculty.

### Outcomes:

- Increased confidence and competence among new faculty members in their teaching roles.
- Establishment of valuable mentor-mentee relationships.
- Enhanced sense of belonging and community among faculty members.
- Increased faculty retention and satisfaction rates.

The Faculty Development Program for newly recruited faculty successfully achieved its objectives in enhancing teaching and research capabilities and fostering a sense of community among faculty members. The program's positive outcomes highlight the importance of investing in faculty development as a means to ensure the college's continued growth and success. About 30 faculty participated in this programme. FDP was concluded by Vote of thanks delivered by Dr. G. Krishnaveni, IQAC Coordinator.

# అత్యుత్తమ ప్రమాణాలు 'కేబీఎన్' సొంతం

**వన్ టౌన్, నవంబరు 24 :** విద్యారంగంలో అత్యుత్తమ ప్రమాణాలను పాటిస్తూ నాణ్యమైన విద్యను బోధిస్తున్నామని అందువలనే పలు పురస్కారాలను అందుకుంటున్నామని కేబీఎన్ కళాశాల సెక్రటరీ అండ్ కరస్పాండెంట్ తూనుకుంట్ల శ్రీనివాస్ అన్నారు. కొత్తపేటలోని కేబీఎన్ కళాశాలకు చెందిన 20 మంది విద్యార్థులు ఇటీవల రాష్ట్ర ప్రభుత్వం అందించిన ప్రతిభా పురస్కారాలను అందుకున్నారు. ఈ సందర్భంగా పురస్కారాలను అందుకున్న విద్యార్థుల అభినందన కార్యక్రమం ఆదివారం కళాశాల ప్రాంగణంలో జరిగింది. కార్యక్రమానికి శ్రీనివాస్ హాజరై విద్యార్థులను అభినందించారు. ఈ సందర్భంగా ఆయన మాట్లాడుతూ ఆయిదున్నర దశాబ్దాలుగా తమ కళాశాల ఉన్నత విద్యావికాసానికి పాటుపడుతోందన్నారు. కేంద్ర, రాష్ట్ర ప్రభుత్వాల నుంచి పలు విభాగాల్లో అనేక బహుమతులు, గుర్తింపులను కళాశాల పొందిందన్నారు. ఇంటర్, డిగ్రీ, పీజీ

**ప్రతిభా పురస్కారాలను అందుకున్న విద్యార్థులను అభినందించిన సెక్రటరీ శ్రీనివాస్, తదితరులు**

కళాశాలకు చెందిన మొత్తం 20 మంది విద్యార్థులు ఒకే సంవత్సరం ప్రతిభా పురస్కారాలతో పాటుగా మరొక విద్యార్థిని బంగారు పతకాన్ని కూడా అందుకోవటం ఆనందంగా ఉందన్నారు. ఇదే స్ఫూర్తితో మిగిలిన విద్యార్థులు కూడా రానున్న కాలంలో

మరిన్ని విజయాలను సాధించాలని సూచించారు. కళాశాల ప్రిన్సిపాల్ డాక్టర్ వినాయకరావు అధ్యక్షతన జరిగిన ఈ కార్యక్రమంలో వైస్ చిప్రస్ ప్రొఫెసర్ వినాయకరావు, డాక్టర్ నవీన్ కుమార్, అకడమిక్ డైరెక్టర్ పి.ఎల్.రమేష్, తదితరులు పాల్గొన్నారు.

## ఈనాడు

### నాణ్యమైన విద్యతోనే ప్రతిభా పురస్కారాలు

**చిట్టిగర్, న్యూస్టుడె:** విద్యారంగంలో అత్యుత్తమ ప్రమాణాలను పాటిస్తూ నాణ్యమైన విద్యను బోధిస్తున్నామని, అందువల్లనే తమ విద్యార్థులు పురస్కారాలు అందుకుంటున్నారని కేబీఎన్ కళాశాల కార్యదర్శి తూనుకుంట్ల శ్రీనివాస్ అన్నారు. ఆదివారం కళాశాలలో అభినందన కార్యక్రమం జరిగింది. ఈ సందర్భంగా ఆయన మాట్లాడుతూ మా కళాశాల చెందిన 20 మంది విద్యార్థులు

ఇటీవల రాష్ట్ర ప్రభుత్వం అందించిన ప్రతిభా పురస్కారాలను అందుకున్నట్లు తెలిపారు. విద్యార్థులను నేటి మార్కెట్ అవసరాలకు అనుగుణంగా వారిని విజ్ఞానవంతులుగా తీర్చిదిద్దేందుకు కృషి చేస్తున్నట్లు తెలిపారు. ఆనంతరం విద్యార్థులను అభినందించారు. కళాశాల ప్రిన్సిపాల్ నారాయణరావు, వైస్ చిప్రస్ ప్రొఫెసర్ వరప్రసాద్, నవీన్ కుమార్, అకడమిక్ డైరెక్టర్ రమేష్, తదితరులు పాల్గొన్నారు.

**ప్రతిభా పురస్కారాలు అందుకున్న విద్యార్థులతో శ్రీనివాస్, నారాయణరావు**

- Ms. Ch. Namratha of M.Sc. Organic Chemistry stood as Krishna University Topper received Gold Medal.

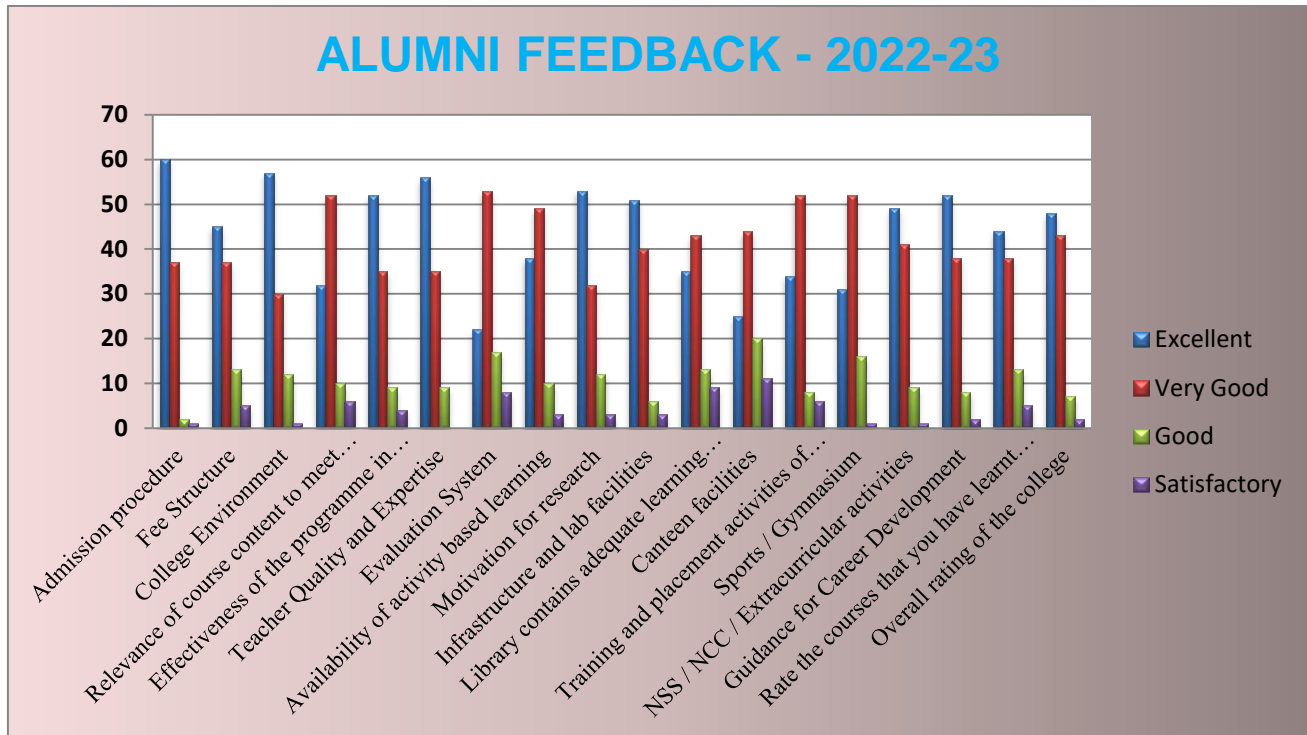

FEEDBACK FROM ALUMNI AND  
EMPLOYERS

## 2022-2023 ACADEMIC YEAR- ALUMNI FEEDBACK ON CURRICULUM

The feedback was collected from 148 Alumni and the observations are noted as follows

### OBSERVATIONS:

- ❑ The alumni of the college expressed their satisfaction with the Library facilities and Placements offered in the college
- ❑ The alumni felt that more number of students should be motivated towards research.
- ❑ The alumni suggested to enhance activity based learning programs.

### ACTION TAKEN:

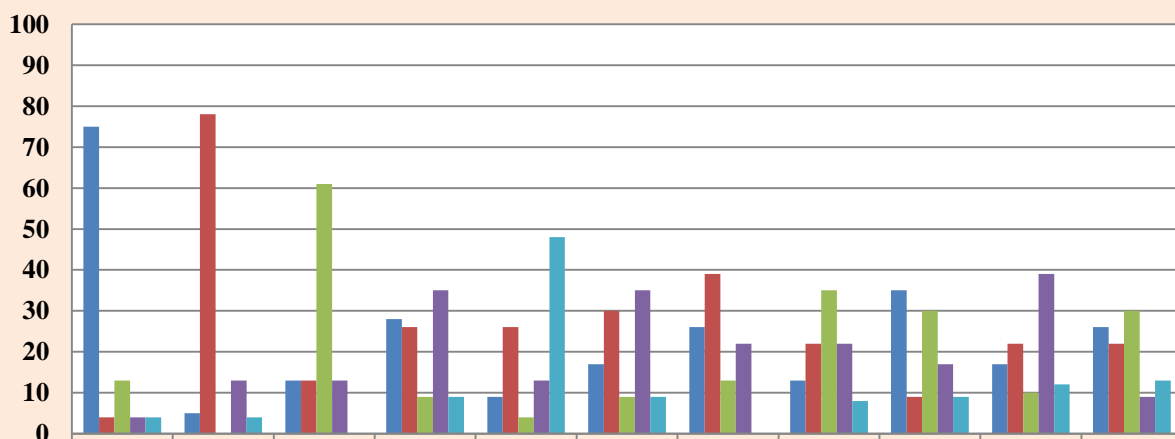

- ❑ The Principal, IQAC coordinator in consultation with Vice-Principals hold a meeting with all the HoDs to suggest measures to be taken to incite research interest in students.
- ❑ It is resolved to conduct more business labs and Hackathon.

Un-Satisfactory	4	4	0	9	48	9	0	8	9	12	13

The feedback was collected from 37 employers and the observations are noted as follows

#### OBSERVATIONS:

- ☒ The employers are quite satisfied with the moral and ethical values imparted in the college to mould the student into a responsible citizen.
- ☒ It is suggested to motivate more number of students for off campus placements.

#### ACTION TAKEN:

- ☒ The Principal instructed the Placement Officer and HoDs of all departments to implement measures aimed at motivating a greater number of students for off-campus placements.

## Employers Feedback-2021-22

■ VERY GOOD 
 ■ GOOD 
 ■ Fair 
 ■ SATISFACTORY

**2021-22:** Feedback is collected from 76 Employers through Online and analysed observations are noted as follows:

**Analysis:**

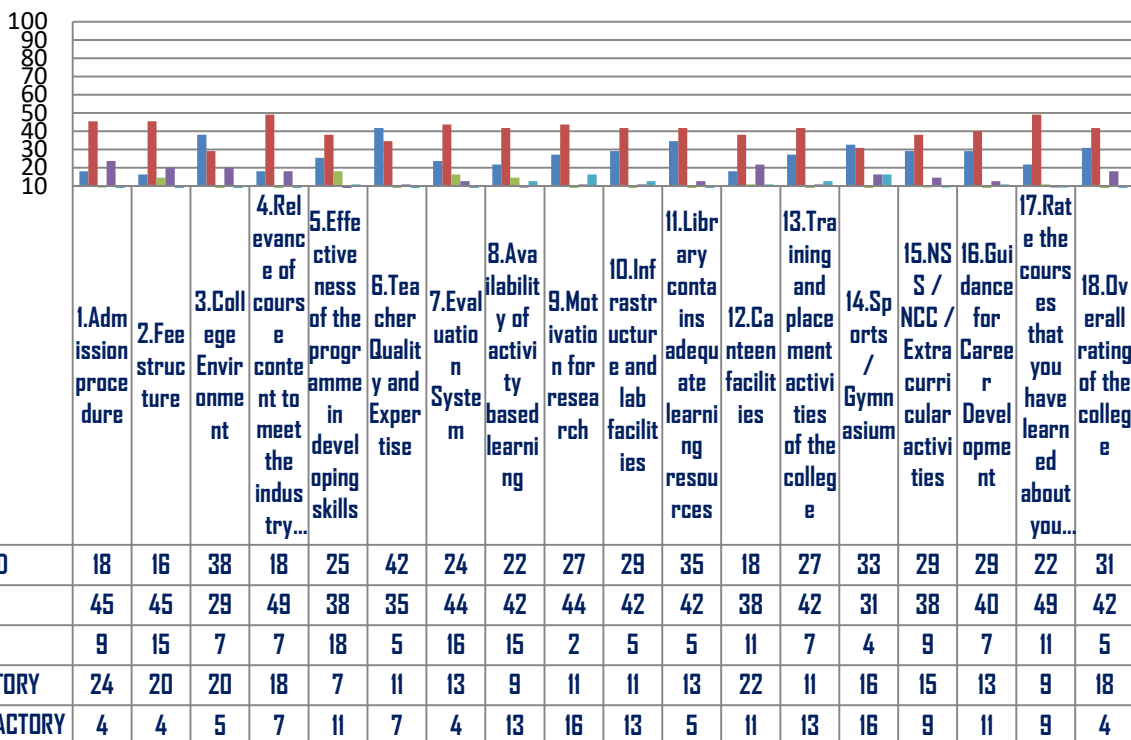

- ✓ A larger number of employability and skill development programmes should be offered to students, according to employers.

**Action Taken:**

- + The Principal instructed the Officer of Placement and Guidance Cell to organize employability and skill development programmes in association with Skill Development Centres like APSSDC.

## ALUMNI FEEDBACK-2020-21

**2020-21:** The feedback was collected from 218 Alumni and the observations are noted as follows:

#### Analysis:

- ✓ The analysis of Alumni feedback reveals that they feel 'Good' for the college admission procedure, fee structure, environment, Relevance of course content to meet the industry standards, Effectiveness of the programme in developing skills, Teacher Quality and Expertise, Evaluation System, Infrastructure and lab facilities, Learning resources and Canteen facilities.
- ✓ A few alumni feel 'Unsatisfactory' for Research activities and sports facilities in the college.

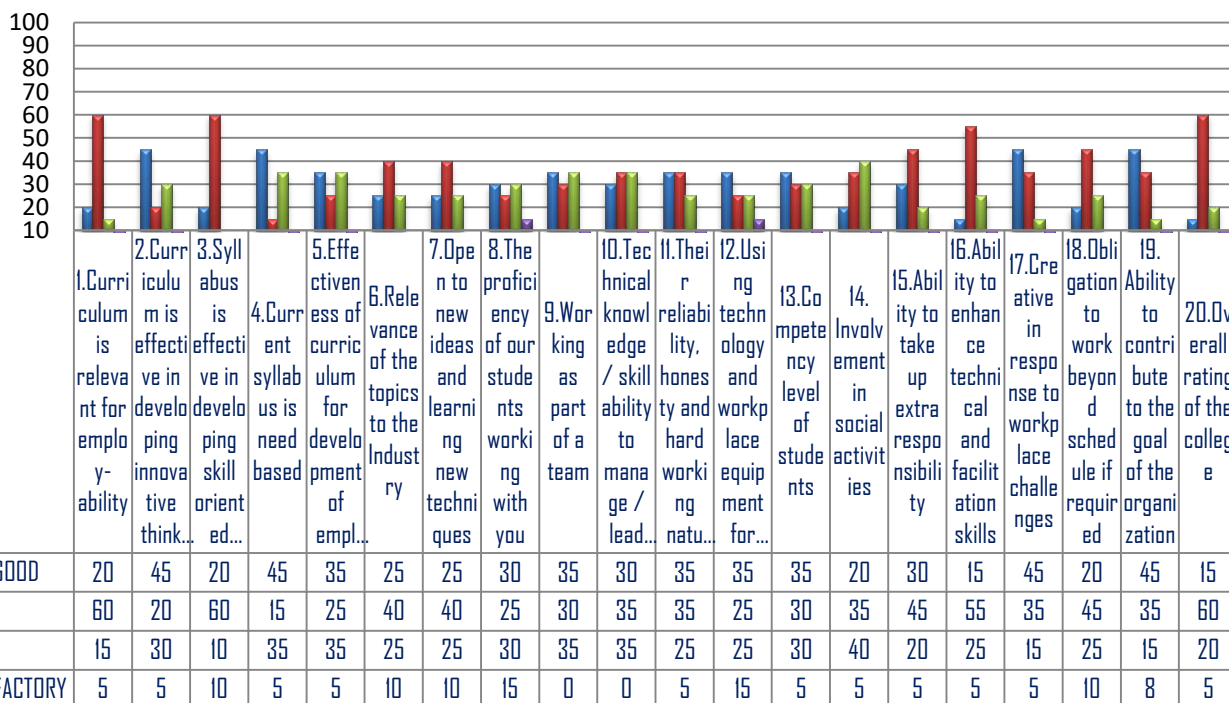

#### Action Taken:

- ✚ To encourage the students to do research, the college allotted seed money for research activities.
- ✚ The college has decided to increase funding to purchase more equipment to serve sports.

 Kakaraparti Bhavanarayana College  
 VIJAYAWADA-1.

## EMPLOYERS FEEDBACK-2020-21

**2020-21:** The feedback is collected from 81 Employers through Online and analysed observations are noted as follows:

### Analysis:

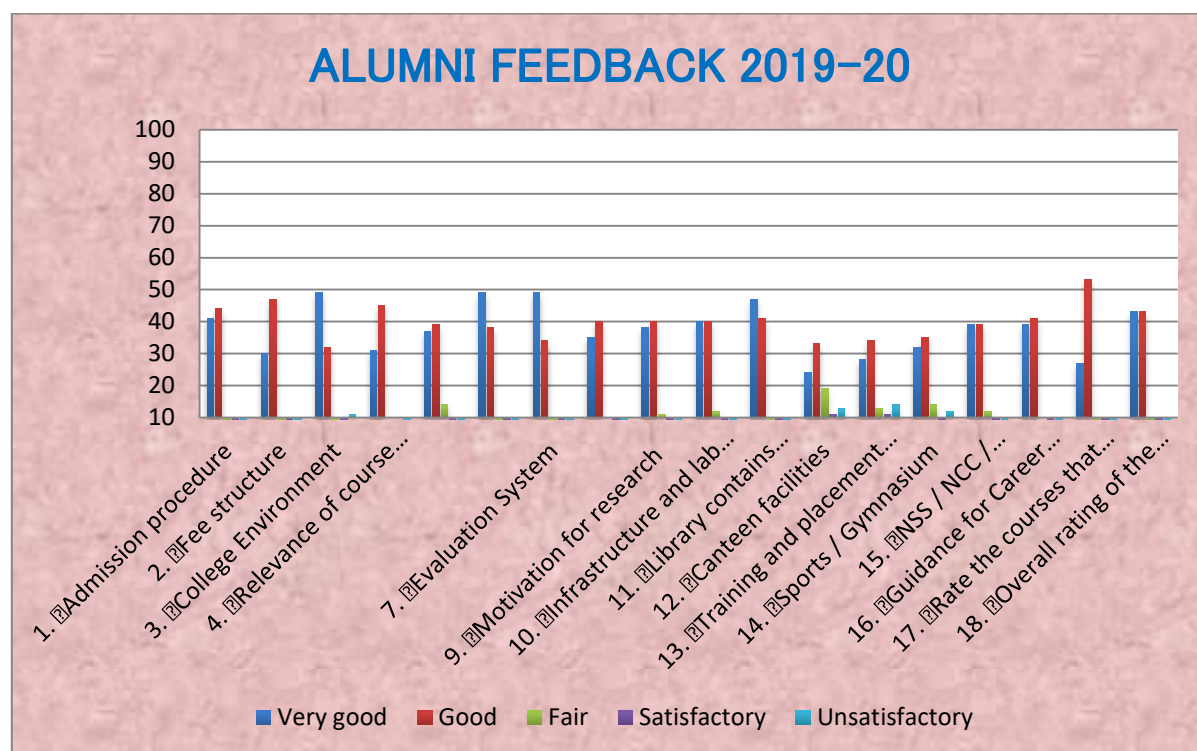

- ✓ More than 50% employers feel 'Good' with the curriculum designed by the college. Few employers suggested to introduce integrated programmes and skill oriented diploma programmes.

### Action Taken:

- ✚ The management is decided to continue the skill oriented Diploma Programmes which were started during the academic year 2020-21.
- ✚ According to National Education Policy the college is planning to introduce integrated programmes in Computer Science, Chemistry and Commerce & Management.

  
**PRINCIPAL-FAC**  
**Kakaraparti Bhavanarayana College**

## KAKARAPARTI BHAVANARAYANA COLLEGE (AUTONOMOUS)

**2019-20:** The feedback was collected from 389 Alumni and the observations are noted as follows:

### Observations:

- ✓ Majority of the alumni felt that placement assistance should be enhanced.
- ✓ It is opined that evaluation of examinations should be done with utmost care.
- ✓ Students should be motivated to participate more in sports.
- ✓ Communication and Soft skills training classes should be increased.

### Action Taken:

- ✚ Training and Placement training classes are conducted regularly.
- ✚ Evaluation of examinations is revamped for the benefit of the students.
- ✚ Intra college sports are conducted.
- ✚ Personality development classes are conducted by inviting eminent personalities.

(Sponsored by: S.K.P.V.V. Hindu High Schools' Committee)

Kothapeta, VIJAYAWADA – 520 001.

A College with Potential for Excellence (CPE) All India 92<sup>nd</sup> Rank in NIRF by MHRD (2017)

## EMPLOYERS FEEDBACK-2019-20

**2019-20:** The feedback was collected from 121 Employers and the observations are noted as follows:

### Observations:

- ✓ It is observed that a low percentage of students are lagging competency skills.
- ✓ Some employers opined that though the students are able to enter the company through their technical skills, they are failing to raise to the top positions.
- ✓ Most of the employers appreciated the honesty and hardworking nature.

### Action Taken:

- ✚ It is resolved to conduct more student activities to improve their competency skills.
- ✚ Students are given motivational training to achieve higher peaks in the career.
- ✚ To sustain the good qualities in the student, value added courses are given top priority.

## ALUMNI FEEDBACK 2018-19

### ALUMNI FEEDBACK - 2018-19

2018-19

The feedback was collected from 110 alumni and the observations are noted as follows

#### Observations

- It is noted that the admission procedure is excellent.
- It is observed that there is a need to bring about a change in evaluation system.
- There is a need to enhance the canteen facilities.
- Training and placement facilities are to be strengthened.

#### Action Taken:

- It is proposed to modify the evaluation procedure by including one internal and one external valuations for PG Courses.
- More varieties and hygiene conditions are properly taken care of.
- CRT classes are increased to reach the expectations of the recruitment procedure.
