The Department of Chemistry successfully organized a Career Orientation Program on Research Projects for B.Sc. Chemistry students on 17th July 2025. The program aimed to provide valuable insights into various research opportunities in the field of chemistry, guiding students in selecting and pursuing projects that align with their interests and career goals. Prof. Murthy served as the Resource Person for the event.

Prof. Murthy, an esteemed expert in the field, served as the Resource Person for the session. He delivered an informative lecture on the significance of research in chemistry, the latest advancements, and the diverse career paths available to students in academia, industry, and research institutions. He also shared practical tips on choosing research topics, writing proposals, and developing essential skills for a successful research career.

The session was highly interactive, with students actively engaging in discussions and seeking guidance on various aspects of research. The program

concluded with a Q&A session, where Prof. Murthy addressed students' queries and provided personalized advice.

The event was well-received by the participants, who found it enlightening and beneficial for their academic and professional growth. The Department of Chemistry looks forward to organizing more such programs to support students in their career development.
